school reform and democratization in China      **Political Sociology of Adult Education** Carlos Alberto Torres, 2013-09-03  
Critical Theorist Carlos Alberto Torres offers a political sociology of adult learning and education based on Critical Social Theory and the always inspiring work of Paulo Freire Empirically grounded and theoretically sophisticated this new book follows the footsteps of his classic book published in the early nineties *The Politics of Nonformal Education in Latin America* Torres book offers comparative and international sociological analyses of adult learning and education an area in which there is an obsession with practice and an aversion to theory with some notable and laudable exceptions but which has the potential to provide avenues for social justice education in ways that no other systems and policies can This book revitalizes social theory in education and provides ample evidence of the power of adult learning and education examining a variety of policy documents connected with the various adult education congresses promoted by the UNESCO which are thoroughly scrutinized for what they bring to or omit from the policy agenda In the context of new developments in adult learning and education particularly the impact of multiple globalizations neoliberalism and the new role of international organizations in reconceptualizing lifelong learning new evidence based research new narratives and the vibrancy of social movements striving for a new and possible world it is clear that new theoretical designs were needed making this is a must read book

**Education and Development** Simon McGrath, 2018-05-08 This title explores the place of education in development debates and provides a systematic as well as a theoretical overview of the main approaches to education and development It emphasises the fact that education is profoundly shaped by national and local cultures even if many issues are shared across institutions in different locations Education and Development discusses different theoretical accounts from different disciplinary traditions to help students understand the complexity of the overall debate The text does not shy away from discussions of education's negative impacts and insists that an account of education must include consideration of early childhood development adult vocational and higher education as well as the growing range of informal and distance forms It includes chapters on human capital human rights and human development and on education gender and development and draws on examples from a wide range of countries and regions such as India Hong Kong Kenya and South Africa The book has a well developed pedagogy including text boxes chapter summaries key questions links to websites and videos and annotated further reading sections Particular attention is paid to ensuring that a plurality of voices contexts and educational sub sectors are represented in the boxes weblinks and references Education and Development provides an introductory overview to the field aimed at the undergraduate level while critically engaging with key themes and questions The book will also be of interest to development practitioners policymakers entrepreneurs and corporate employees engaged in aspects of education and development work      *Hegemony and Education Under Neoliberalism* Peter Mayo, 2015-03-12 Based in a holistic exposition and appraisal of Gramsci's writings that are of relevance to education in neoliberal times this book rather than simply applying Gramsci's theories to issues in education argues that education constitutes the leitmotif of his entire

oeuvre and lies at the heart of his conceptualization of the ancient Greek term hegemony that was used by other political theorists before him Starting from this understanding the book goes on to compare Gramsci s theories with those of later thinkers in the development of a critical pedagogy that can confront neoliberalism in all its forms *Transitioning Education in Africa* Gia Cromer,2023-08-08 *Transitioning Education in Africa* External Education Providers Emergencies and Authoritarian Structures explores how transitions from education in emergency to post conflict education systems are planned and managed at the national level Currently education for refugees is largely accomplished in emergency or crisis situations by external education providers EEPs in authoritarian contexts Using historical analysis of education policies appreciative inquiry surveys and semi structured interviews Gia Cromer argues that despite historic and current international community stated goals of increasing government capability to provide education neither EEPs nor refugee hosting countries have made these changes especially at the national level This book provides insights on both historical norms toward Africa and authoritarian organizational philosophies and structures that could be contributing to this failure to successfully transition procedures to provide education It also provides one of the few analyses of the problems in education provision for displaced people asylees and refugees specific to eleven countries in Africa The analysis concludes with education policy recommendations for national level education administrators to philosophically and practically decolonize education for the self determination of future education structures in Africa Echoes from Freire for a Critically Engaged Pedagogy Peter Mayo,2012-12-20 In this concise and accessible text Peter Mayo outlines some of the major concepts in Freire s praxis In pursuit of a critically engaging pedagogy Mayo compares Freire s work with a range of other thinkers and educators including Lorenzo Milani Antonia Darder John Dewey Margaret Ledwith Antonio Gramsci and Henry Giroux Chapters in the book include discussions of the State s role in education specifically higher education a critical analysis of the dominant discourse in education centering on competences and the type of slant this discourse takes a study of adult education through a Freirean lens an historical view of Nicaragua s Freire inspired literacy and popular education campaigns of 1980 a fresh perspective on the role of social movements in the contexts of social transformation a new analysis of the relevance of Freirean concepts for transformative research and an exploration of educators as intellectuals and social actors The result is a compelling study of how Paulo Freire s writings continue to resonate around the world and of how we must continue to apply and interpret them anew Sociology of Education: Theories and methods Stephen J. Ball,2000 Learning from Comparing: new directions in comparative education research Robin Alexander,Patricia Broadfoot,David Phillips,1999-01-01 *Learning from Comparing* is a major two volume study which reassesses the contribution of comparative educational research and theory to our understanding of contemporary educational problems and to our capacity to solve them At a time when educational research is under attack on the grounds of bias and irrelevance and under pressure to address only those questions which are acceptable politically as good a definition of bias as any this is a serious attempt to

bridge the worlds of research policy and practice The editors have put together a collection in terms of both perspective and nationality which ensures contrasting viewpoints on each topic

**Policy-making for Education Reform in Developing Countries** James H. Williams, William K. Cummings, 2005-03-31 The first book in a two volume series designed to help those working or preparing to work as education change agents in developing countries this volume will help change agents acquire a deeper more comprehensive understanding of the policy process and how it can be influenced

*Globalization of an Educational Idea* Ingrid Miethe, Tim Kaiser, Tobias Kriele, Alexandra Piepiorka, 2019-07-22 In this book authors showcase the worldwide spread of Workers Faculties as an example of both cooperation between socialist countries in education and globalization processes in the field of education Based on extensive research carried out in Cuban German Mozambican and Vietnamese archives as well as expert interviews it combines detailed case studies of educational transfers and policy implementation with a discussion of theoretical approaches to the study of globalization in and of education Research on Workers Faculties provides an especially interesting example for the study of educational transfer between socialist countries as well as for the interplay of such transfers with processes of globalisation for two reasons On one hand the first Workers Faculties were established already shortly after the October Revolution in Russia and Workers Faculties continue to exist in Cuba until today A study of these institutions therefore provides a dynamic perspective covering the whole period of the existence of the socialist camp On the other hand the spread of the Workers Faculty idea to four continents allows for an analysis that takes into account widely differing local contexts This book offers an analysis of general trends and particularities in the history of the global spread of the Workers Faculty idea and its implementation in local contexts Finally it discusses the results with a view towards theories of globalization in the field of education as well as of specificities of processes of socialist globalization
