**Educational Research: Why 'What Works' Doesn't Work** Paul Smeyers, Marc Depaepe, 2007-01-07 Education and educational research according to the current fashion are supposed to be concerned with what works to the exclusion of all other considerations All over the world and particularly in the English speaking countries governments look for means of improving student achievement as measured by standardized test scores Although such improvements are often to be welcomed they do not answer all significant questions about what constitutes good education Also the research on which they are based is not the

only legitimate way to do educational research Social research and therefore educational research cannot ignore the distinctive nature of what it studies a social activity where questions of meaning and value cannot be eliminated and where interpretation and judgment play a crucial role In this book distinguished philosophers and historians of education from 6 countries focus on the problematical nature of the search for what works in educational contexts in practice as well as in theory Beginning with specific problems they move on to more general and theoretical considerations seeking to go beyond over simple ideas about cause and effect and the rhetoric of performativity that currently has educational thinking in its grip Freedom of inquiry in educational research can no longer be taken for granted Narrow definitions of what constitutes scientific research funding criteria that enforce particular research methods and policy decision processes that ignore any research that is not narrowly utilitarian create a context in many countries that discourages scholarship of a more speculative exploratory or critical sort This book brings together an exceptional combination of international and cross disciplinary scholars who bring the perspectives of history and philosophy of science to ask How did we arrive at this place and Where is educational research heading Thebook illuminates the anti intellectual consequences of a what works mentality in education and shows that the ostensibly scientific revolution in educational research in fact reflects an ahistorical and conceptually muddled understanding of what actually constitutes science This book could not be more timely and important Nicholas C Burbules Grayce Wicall Gauthier Professor University of Illinois With research increasingly tied to State policies with the instrumental purpose of guiding school reforms the volume provides an important historical and philosophical questioning of the possibilities limitations and challenges of education research Internationally leading scholars engage in a significant conversation that is sophisticated and nuanced for understanding contemporary debates Thomas S Popkewitz the University of Wisconsin Madison USA This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Evaluation and Evolution of the Criteria for Educational Research

Manning, Carlotta Santini, 2022-10-24 The place or absence of God in Nietzsche's thought remains central and controversial Nietzsche's proclamation of the death of God is one of the most famous and parodied slogans in modern philosophy seeming to encapsulate the nineteenth century loss of religious faith in the affirmation that God has turned out to be our oldest lie and yet the nature of Nietzsche's own theology is far from clear This volume engages with Nietzsche's arguments about God theology and religion The volume extends the discussion to an engagement of Nietzsche with alternative models of God with ancient Greek religions and with discussions of diversity race class gender sex in dis conjunction with religion The chapters examine Nietzsche's genealogy of religion and his claims about the place of God and theology in the history of Western thought that faith of the Christians which was also Plato's faith as well as his engagements with alternative conceptions of God The volume also examines the historical and contemporary reception of Nietzsche's arguments about God by religious and non religious thinkers asking to what extent Nietzsche's philosophy of God speaks to the challenges of today's globalized philosophy and religion Ahuman Pedagogy Jessie L. Beier, Jan Jagodzinski, 2022-07-14 This book brings together a

collection of multi disciplinary voices to discuss debate and devise a series of ahuman pedagogical proposals that aim to address the challenging ecological political social economic and aesthetic milieu within which education is situated today Attending to contemporary calls to decenter all too human educational research and practice while also coming to terms with the limits and inheritances through which such calls are made possible in the first place this book aims to interrogate but also invent what we are calling an ahuman pedagogy Organized in three main sections Conjuring an Ahuman Pedagogy Machinic Re distributions and Non pedagogies for Unthought Futures this multi disciplinary experiment in ahuman pedagogies for the age of the Anthropocene offers an experimental albeit always speculative and incomplete series of pedagogical proposals that work to unthink and counter actualize educational futures as usual Humanizing Education in the 3rd Millennium R. **Pragmatism, Education, and Children** ,2008-01-01 This book presents fourteen new essays by international scholars about the intersections between pragmatism education and philosophy with children Pragmatism from its beginnings has sought a revolution in learning and is itself a special kind of philosophy of education What can the applications of pragmatism to pedagogy around the world teach us today *Measuring Up in Education* Steven Stolz,R. Scott Webster,2020-05-21 Cultures of measurement are often considered to dominate educational practices to the degree that as Biesta 2010 has identified in Good Education in an Age of Measurement we no longer measure what we value but rather we have become conditioned to value what is measured A clear example of this occurs when institutions and staff teach to the test by emphasising narrow conceptions of learning and of knowledge simply because the consequences of high stakes assessments

have important implications regarding funding resources and even tenure This collection explores via various philosophical means how valuable educational practices can occur within and beyond cultures of measurement What seems to be required is for practitioners in education to regain their relationship to the overall purposes of education such as the furthering of justice and democracy for both individual students and societies as a whole Such a reconnection has the potential to re humanise curricular experiences for students which may have become dehumanised through particular cultures of measurement It is argued that certain legitimate measures can advance justice and democracy and so careful attention must be assigned to their validity and value This book was originally published as a special issue of Educational Philosophy and Theory

**Showing and Doing** Michael A. Peters, Nicholas C. Burbules, Paul Smeyers, 2015-11-17 Three prominent Wittgenstein scholars introduce the broad educational significance of Ludwig Wittgenstein's work to a wider audience of educational researchers and practitioners through provocative innovative and playful readings of his work They vividly demonstrate the influence of his thinking and its centrality to understanding our contemporary condition Wittgenstein fundamentally shaped contemporary theories of language representation cognition and learning The book also traces the pedagogical turn of his thinking during the period from 1920 to 1926 What is most radical about Wittgenstein's later work is that it suggests learning and initiation into practices are fundamental to understanding his philosophy The book not only provides a new and fresh interpretation of Wittgenstein's thought but also explores a new way of thinking about education as a way of revealing the educational dimension of philosophical problems
