Keeves,Ryo Watanabe,2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region      *The Routledge International Handbook of European Social Transformations* Peeter Vihalemm,Anu Masso,Signe Opermann,2017-11-22 This book focuses on social transformations as one of the central topics in the social sciences The study of European social transformations is very valuable in the context of universal discussions within social sciences

**Online Distance Education** Margaret Gorts Morabito,1999 Many educators and the public are interested in online distance

education in particular Internet based schooling The underlying assumption is that this is a new and untested fad in education This is due in part to a lack of documentation within academia of the early development of online distance education and in part to a shortage of experienced practicing online schools On the Internet one may become confused by the flurry of activity and by the various claims from organizations that they are providing a revolutionary method of instruction online teaching Furthermore many people are unaware of the long and distinguished history of distance education itself that is the root of current day Internet based schooling Despite the uncertainty the public is clearly demanding online distance education This dissertation helps to resolve these problems This study fills various needs for the purpose of showing the effective application of online distance education Educational administrators teachers and the public must be assured that online distance teaching is a valid and proven instructional method Furthermore administrators and teachers need to know what to expect when planning operating and teaching in an online school Through historical analysis and the presentation of a practicing Internet based school this study fills these needs This dissertation results from fifteen years of independent study and research by the author combined with professional experience in the field of online distance education including Internet based school design and operation Conclusions result from published studies in distance education from research conducted in the 1980s concerning publicly available online distance education and from experience in developing administrating and teaching in an international Internet based school that has been in continual operation online since 1986 The author concludes that 1 online distance education has a proven track record 2 there is continual demand from the global community for Internet based instruction as well as a public demand for traditional institutions to accept this nontraditional method of study and 3 administrators and teachers can economically create and operate an effective Internet based school that is accessible to and affordable for individual learners using low cost personal computers
