Elliott, Thomas R. Kratochwill, Joan Cook Littlefield, 2000-05-01 Educational Psychology Effective Teaching Effective Learning arms students with the current practical knowledge they need to become effective teachers The applied focus unique case study approach and real life context of the text give your students the important skills they need to become tomorrow s teachers for diverse classrooms and students Effective teaching requires more than straightforward teaching methods teachers need to know their students well and able to adapt their teaching style to a particular classroom and individual students The result effective learning Educational Psychology Effective Teaching Effective Learning provides more actual tools for future teachers than any other educational psychology text It arms students with current practical knowledge gives them excellent coverage of traditional and emerging topics in educational psychology offers a balanced theoretical orientation cognitive social and behavioral and consistently uses classroom examples to illustrate how these theories work The text provides excellent coverage of both traditional and emerging topics in educational psychology from a multi author team with complementary areas of expertise allowing for more overall depth and breadth In the third edition a new unique case study approach links text concepts and strategies to the actual practice of teaching Each section of the text begins with a case that is carried throughout the section s four chapters To help students problem solve in the classroom each chapter contains Case Notes and ends with ideas for improving the case situation Case Reflections Following each section is a feature called Teacher s Case Conference which offers informed discussion by real teachers The third edition greatly increases coverage of constructivism in chapters 2 7 and 8 The number of chapters has been reduced from 15 to 13 and an appendix on research methods has been added The strong applied focus of the text now uses five new themes for effective teaching running throughout the book communication motivation assessment learning and time A new feature TIPS Teaching Interaction Principles and Strategies provides over 100 brief summaries of key teaching principles throughout the text

**Educational Psychology** Stephen N. Elliott, 1996-04-01 Educational Psychology Effective Teaching Effective Learning arms students with the current practical knowledge they need to become effective teachers The applied focus unique case study approach and real life context of the text give your students the important skills they need to become tomorrow s teachers for diverse classrooms and students Effective teaching requires more than straightforward teaching methods teachers need to know their students well and able to adapt their teaching style to a particular classroom and individual students The result effective learning Educational Psychology Effective Teaching Effective Learning provides more actual

tools for future teachers than any other educational psychology text. It arms students with current practical knowledge, gives them excellent coverage of traditional and emerging topics in educational psychology, offers a balanced theoretical orientation, cognitive, social, and behavioral, and consistently uses classroom examples to illustrate how these theories work. The text provides excellent coverage of both traditional and emerging topics in educational psychology from a multi-author team with complementary areas of expertise, allowing for more overall depth and breadth. In the third edition, a new unique case study approach links text concepts and strategies to the actual practice of teaching. Each section of the text begins with a case that is carried throughout the section's four chapters. To help students problem-solve in the classroom, each chapter contains Case Notes and ends with ideas for improving the case situation, Case Reflections. Following each section is a feature called Teacher's Case Conference, which offers informed discussion by real teachers. The third edition greatly increases coverage of constructivism in chapters 2, 7, and 8. The number of chapters has been reduced from 15 to 13, and an appendix on research methods has been added. The strong applied focus of the text now uses five new themes for effective teaching running throughout the book: communication, motivation, assessment, learning, and time. A new feature, TIPS: Teaching Interaction Principles and Strategies, provides over 100 brief summaries of key teaching principles throughout the text.

**Educational Psychology** Lynne Blesz Vestal, Thomas R. Kratochwill, John F. Travers, Stephen N. Elliott, 1993

**Educational Psychology for Effective Teaching** Kenneth T. Henson, Ben F. Eller, 1999. Offers a broad overview of the basic principles of educational psychology and its application to teaching. It is designed to give the student a solid understanding of student characteristics, learning theories, and their applications; the psychological basis for teaching methods; motivational methods; and measurement and evaluation.

**Teaching for Effective Learning in Higher Education** N. Hativa, 2012-12-06. Research on teaching in higher education shows that students who are well taught learn more than students who are poorly taught, and there are some teaching behaviors and strategies that are consistently associated with good teaching. This book identifies these strategies and presents them within a theoretical framework that explains how they promote students' active and meaningful learning. By presenting teaching as a logical structure of interconnected behaviors whose contribution to student learning is based on theory and research, the book promotes teachers' pedagogical knowledge and their perception of teaching as scholarly intellectual work. The book provides extensive practical advice that is based on the vast experience of the author as an instructional consultant and on research on accomplished teachers taken from the domains of education psychology and speech communication. The practical ideas are separated from the theoretical part in a way that makes them easily identifiable. The book also puts forth the voice of the students through authentic comments that they wrote in thousands of instructor evaluation forms that the author collected over many years.

**The Psychology of Effective Learning and Teaching** Matt Jarvis, 2005. This book covers the psychology of teaching and learning and focuses on applying up-to-date as well as traditional theory in the classroom. It covers a range of
