

Educational anthropology

In a general sense, educational anthropology involves the use of anthropological theory, data, and methods to study educational practices, institutions, and problems in their proper cultural contexts. The range of educational institutions studied varies from highly formal school systems in industrialized societies to very informal systems in which important cultural knowledge is passed down from generation to generation by kin through such means as storytelling, experiential learning, and peer interaction. The 1960s and 1970s witnessed many case studies in education and culture. For example, Thomas Williams (1969) wrote *A Borneo Childhood*, a study of how Dusun children learned what they needed to know at different stages of development; Margaret Read (1960) wrote *Children of Their Fathers, an ethnography of growing up among the Ngoni of Malawi*; and Bruce Grindal (1972), in his work *Growing Up in Two Worlds, ethnographically* examined how the Sisala children of northern Ghana were caught between traditional and more modern forms of education. At the same time, other educational anthropologists were working closer to home. For example, Gerry Rosenfeld (1971) studied school failure among Black children in Harlem schools, John Hostetler and Gertrude Huntington (1971) studied the process of education among the Amish in Ohio, and Martha Ward (1971) examined speech acquisition among Black children near New Orleans.

Hodges,2011 This unique anthology outlines and reconsiders the disciplinary origins of the anthropology of education The book is a student oriented compilation of classic articles written by anthropologists who helped pioneer the field some fifty years ago Their names constitute a veritable who's who in cultural anthropology Kluckhohn Linton Mead Benedict and Redfield to name a few who while accomplished in the general area of cultural anthropology nevertheless gave specific attention to the developing area of the anthropology of education Also included in the collection are contemporary classics by non anthropologists such as Paulo Freire James Baldwin and Jonathan Kozol who tackle more recent issues facing education and educators The readings are termed classic because collectively they represent the best of that to which today's students of the anthropology of education should be exposed for a first rate introduction to the field However despite their relevance and importance many of these articles are out of print difficult to find or otherwise unavailable Still there is an abiding need for the insights they provide The need for the thinking of these pioneers is as great today arguably greater than when the articles were written Their contributions and insights must not succumb to the awful tendency of our times for scholarship to be both instant and disposable **Unlocking Minds: Nurturing the Power of Education** Lucien Sina,2024-06-05

Education for Reflective Ministry J. A. van der Ven, 1998 The picture that pastors have of themselves and of their experiences in the ministry is ambivalent On the one hand they find the pastoral work which they perform meaningful important and relevant On the other hand pastors suffer from chronic stress of some sort caused by different factors on the micro meso and macro level of religion church and society Many pastors experience the modernization and subsequently the secularization process as a very serious problem which negatively influences religious life within the parish Pastors are bowed down by uncertainty over how their work contributes to the parish mission in today s society and even more so by doubts over what that mission is in particular the diaconal mission Which direction can shall should the pastor take if neither the church nor the theological institutions are able to provide him or her with a clear frame of reference an attractive perspective a convincing policy a plausible course of action and a meaningful set of aims goals and objectives There is no alternative but to risk taking responsibility for oneself and choosing one s own course of action To take this risk is not reckless or foolhardy as long as the choices are always informed by a religious self reflection that is open to tradition as well as to the future This allows the pastor to be his own guide to transgress useless customs and habits and cross the boundaries into as yet unknown territory The task of education must be to provide the foundation that enables the pastor to make those choices and take those risks in a well considered prudent and truly religious manner This study represents not only an interpretative description of some of the education for ministry in today s societal cultural and ecclesiastical context in the western world but also a proposal for a new model the reflective ministry model
