degree of freedom 45 t table value was 1.6794. Since the value of t obtained is higher than that of t table the null hypothesis was rejected and the alternative hypothesis was accepted. Based on the result of the questionnaire it was found that the total score of positive response was 225 of all 24 pupils. This means that 93.75% pupils who participated in 10 week intervention of scaffolding technique had positive response to all of the statements in the questionnaire.
