George Alan CONNOR,1959 Tune in on the World with Esperanto, the World Interlanguage Esperanto Association of North America,1964* **The Runaway Species** David Eagleman,Anthony Brandt,2018-06-19 This enlightening examination of creativity looks at art and science together to examine how innovations build on what already exists and rely on three brain operations bending breaking and blending The Wall Street Journal The Runaway Species is a deep dive into the creative mind a celebration of the human spirit and a vision of how we can improve our future by understanding and embracing our ability to innovate David Eagleman and Anthony Brandt seek to answer the question what lies at the heart of humanity s ability and drive to create Our ability to remake our world is unique among all living things But where does our creativity come from how does it work and how can we harness it to improve our lives schools businesses and institutions Eagleman and Brandt examine hundreds of examples of human creativity through dramatic storytelling and stunning images in this beautiful full color volume By drawing out what creative acts have in common and viewing them through the lens of cutting edge neuroscience they uncover the essential elements of this critical human ability and encourage a more creative future for all of us The Runaway Species approach es creativity scientifically but sensitively feeling its roots without pulling them out The Economist The World's Languages Stechert-Hafner, Inc,1962

Language Anxiety Tim William Machan,2009-01-29 This engaging and wide ranging history of language anxiety ranges from the Tower of Babel to the internet It shows how worry about language results from and causes linguistic change as well as fuelling perennial concerns about class culture identity and social change Papers in Computational Linguistics Ferenc Papp,György Szépe,2020-01-20 No detailed description available for Papers in Computational Linguistics L'Amerika Esperantisto ,1950 **Studies of Literature from Marginalized Nations in Modern China, with a Focus on Eastern European Literature** Binghui Song,2024-04-14 This book presents the first systematic study of the 100 year history of translation research reception and influence of Central and Eastern European literature in China from the late Qing Dynasty to the end of the twentieth century This study of Eastern European literature from the perspective of Sino foreign literary relations is based on extensive research into the translation and reception of Central and Eastern European writers such as Milan Kundera S ndor Pet fi Henryk Sienkiewicz Julius Fucik and Bertolt Brecht Since the late nineteenth century the major Chinese writers have paid special attention to the literature of the marginalized Eastern European nations when they have to translate from translations since few of them understand Eastern European languages The book seeks to identify what attracted the founders of new Chinese literature to Eastern European literature and to define its unique significance for the

construction of modern Chinese literature Scientific Babel Michael D. Gordin, 2015-04-13 English is the language of science today No matter which languages you know if you want your work seen studied and cited you need to publish in English But that hasn't always been the case Though there was a time when Latin dominated the field for centuries science has been a polyglot enterprise conducted in a number of languages whose importance waxed and waned over time until the rise of English in the twentieth century So how did we get from there to here How did French German Latin Russian and even Esperanto give way to English And what can we reconstruct of the experience of doing science in the polyglot past With Scientific Babel Michael D Gordin resurrects that lost world in part through an ingenious mechanism the pages of his highly readable narrative account teem with footnotes not offering background information but presenting quoted material in its original language The result is stunning as we read about the rise and fall of languages driven by politics war economics and institutions we actually see it happen in the ever changing web of multilingual examples The history of science and of English as its dominant language comes to life and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices but also of the possibilities of the polyglot and the losses that the dominance of English entails Few historians of science write as well as Gordin and Scientific Babel reveals his incredible command of the literature language and intellectual essence of science past and present No reader who takes this linguistic journey with him will be disappointed Congressional Record United States. Congress, 1951 **Minority Languages and Group Identity** John Edwards, 2010-01-01 The central concern in this book is the relationship between language and group identity a relationship that is thrown into greatest relief in minority settings Since much of the current interest in minority languages revolves around issues of identity politics language rights and the plight of endangered languages one aim of the book is to summarise and analyse these and other pivotal themes Furthermore since the uniqueness of every language contact situation does not rest upon unique elements or features but rather upon the particular weightings and combinations of features that recur across settings the second aim here is to provide a general descriptive framework within which a wide range of contact settings may be more easily understood The book thus begins with a discussion of such matters as language decline maintenance and revival the dynamics of minority languages and the ecology of language It then offers a typological framework that draws and expands upon previous categorising efforts Finally the book presents four case studies that are both intrinsically interesting and more importantly provide specific illustrations of the generalities discussed earlier **Other Tongues - Other Flesh** George Hunt Williamson, **Library of Congress Catalogs** Library of Congress, 1960 AF Manual United States. Department of the Air Force, 1956 **The Loom of Language** Frederick Bodmer, 1985 Here is an informative introduction to language its origins in the past its growth through history and its present use for communication between peoples It is at the same time a history of language a guide to foreign tongues and a method for learning them It shows through basic vocabularies family resemblances of languages Teutonic Romance Greek

helpful tricks of translation key combinations of roots and phonetic patterns It presents by common sense methods the most helpful approach to the mastery of many languages it condenses vocabulary to a minimum of essential words it simplifies grammar in an entirely new way and it teaches a language as it is actually used in everyday life
