provides rare and profound insights into the use of Esperanto in a large number of communicative areas. It studies the speakers' use of code switching, phraseology and metaphors, techniques they employ to enhance understanding such as metacommunication and repair strategies as well as their predilection for humour. The study also contributes to a comparison between the communication in Esperanto and in the language that is now predominantly used as a lingua franca, English, and allows conclusions to be drawn on the question of what a lingua franca is all about. *Bridge of Words* Esther

Schor, 2016-10-04 A history of Esperanto, the utopian universal language invented in 1887 *The Esperanto Movement*

Peter Glover Forster, 1982 *CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE* brings to students, researchers and practitioners in all of the social and language-related sciences carefully selected book-length publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians, etc. to the development of the sociology of language. **Esperanto and Its Rivals**

Roberto Garvía Soto, Roberto Garvía, 2015-06-04 Roberto Garvía explores the history of artificial spoken or written languages and the people who fought for them. Taking the three most prominent: Volapük, Esperanto and Ido, Garvía investigates what drove so many to invest incredible energy and time to learn and promote them. **Esperanto Revolutionaries and Geeks**

Guilherme Fians, 2022-01-04 This book explores how Esperanto, often regarded as a future-oriented utopian project that ended up confined to the past, persists in the present. Constructed in the late nineteenth century to promote global linguistic understanding, this language was historically linked to anarchism, communism and pacifism. Yet what political relevance does Esperanto retain in the present? What impacts have emerging communication technologies had on the dynamics of this speech community? Unpacking how Esperanto speakers are everywhere but concentrated nowhere, the author argues that digital media have provided tools for people to re-politicise acts of communication, produce horizontal learning spaces and ultimately build an international community. As Esperanto speakers question the post-political consensus about communication rights, this language becomes an ally of activism for open source software and global social justice. This book will be of relevance to students and scholars researching political activism, language use and community building as well as anyone with an interest in digital media more broadly. J.R.R. Language and Power in the Creation of the USSR, 1917-1953 Michael G. Smith, 1998 Explores the cultural and ethnic aspects of the early Soviet era focusing on the way the Bolsheviks and other groups used language Covers the divided speech communities of the late imperial and early Soviet eras how linguists contributed to Soviet cultural and national policies during the 1920s and 30s the

successes and failures of the major language reform projects during the 1920s and the period between 1932 and 1953 when the party state imposed new standards of russification on the country as a whole The author concludes that while the opportunities and constraints of language reform may have given Soviet leaders their most enduring insights into relations they learned that language was an essential tool of the dialectical process of history and also a troublesome and treacherous dimension of the human experience Annotation copyrighted by Book News Inc Portland OR

Esperanto, Interlinguistics, and Planned Language Humphrey Tonkin, 1997 A collection of 11 papers one in German and an interview in French with Umberto Eco The topics include the term planned language Esperanto as a unique model for general linguistics a dialogue between sociolinguistic sciences and Esperanto culture the experience of Esperanto in developing a language for international law and machine translation No index Annotation copyrighted by Book News Inc Portland OR

Language Matters Timothy Reagan, 2009-04-01 This book addresses a timely and very important topic language in education Language apparently is a very tricky business On the one hand everyone uses language and virtually everyone has strong views about language In the educational domain this seems to be especially true Language is not merely an intrinsic component of the educational process as the medium of instruction in the classroom but also serves as the mediator of social reality for students and teachers alike It plays a central role in articulating and conveying not only social cultural and empirical ideas but ideological concepts as well It is also used to make judgments about the speaker not to mention its role in maintaining differential power relations And yet in spite of this the role of language is not sufficiently recognized in classroom practice much of the time Nor is language except in fairly narrow ways really an especially central part of the curriculum in spite of its incredible importance To be sure we do spend a great deal of time and money attempting to teach students to read and write that is to provide them with basic literacy skills and we provide nominal support for foreign language education programs We also provide limited support for children coming to school who do not speak English What we do not do though is to recognize the absolute centrality of language knowledge and language use for the educated person This book seeks to address these issues from the broad perspective of critical pedagogy

International Language, 1924

In the Land of Invented Languages Arika Okrent, 2009-05-19 Here is the captivating story of humankind's enduring quest to build a better language and overcome the curse of Babel Just about everyone has heard of Esperanto which was nothing less than one man's attempt to bring about world peace by means of linguistic solidarity And every Star Trek fan knows about Klingon But few people have heard of Babm Blissymbolics Loglan not to be confused with Lojban and the nearly nine hundred other invented languages that represent the hard work high hopes and full blown delusions of so many misguided souls over the centuries With intelligence and humor Arika Okrent has written a truly original and enlightening book for all word freaks grammar geeks and plain old language lovers

ENCYCLOPEDIA OF LANGUAGE AND EDUCATION This is one of eight

volumes of the Encyclopedia of Language and Education published by Kluwer Academic. The publication of this work signals the maturity of the field of language and education as an international and interdisciplinary field of significance and cohesion. These volumes confirm that language and education is much more than the preserve of any single discipline. In designing these volumes we have tried to recognise the diversity of the field in our selection of contributors and in our choice of topics. The contributors come from every continent and from more than 40 countries. Their reviews discuss language and education issues affecting every country in the world. We have also tried to recognise the diverse interdisciplinary nature of language and education in the selection of the editorial personnel themselves. The major academic interests of the volume editors confirm this. As principal volume editor for Volume 1, Ruth Wodak has interests in critical linguistics, sociology of language and language policy. For Volume 2, Viv Edwards has interests in policy and practice in multilingual classrooms and the sociology of language. For Volume 3, Bronwyn Davies has interests in the social psychology of language, the sociology of language and interdisciplinary studies.
