continued to work without government regulated safety and health controls until the early 1870s The author explores the reasons for this taking into account socio economic environmental medical technical and cultural factors that determined the chronology and nature of early reform The comparative approach between the coal and metalliferous mining sectors provides a useful model for exploring the significance of organized labour in gaining health and safety concessions particularly as the miners in the metalliferous sector in contrast to the colliers who unionised early placed a high value on independence and self sufficiency in the workplace As an investigation into the formation of health and safety legislation in a major industry this work will be valuable to all those with an interest in medical history occupational health legal history and the social history of work in the nineteenth century [The Engineers of Cornwall at the Mines of Pontgibaud in France](#) Michael T.
