Essays In Humanity And Technology:

Essays in Humanity and Technology David Lovekin, Donald Phillip Verene, 1978 On the Edge of Human Technology Gote Sture Nyman, 2020-01-22 Human ICT based technology changes its character faster than technology itself. We need to think anew the nature of human technology relationships. The book introduces some of the elements in this kind of thinking and gives practical examples of real and speculative concepts for future development. Humanification of technology including AI is a leading principle throughout the text. The book is a personal collection of essays which have emerged from the author's decades long work with digital technologies. Several topics, some practical and some speculative, are introduced, e.g., on image quality, behavior data in the net, human implementation of AI, network representations of human behavior, perception as a strategy process, and even the human-centric nature of physics among many others.

The Human Soul: Essays in Honor of Nalin Ranasinghe Predrag Cicovacki, 2022-02-01 This collection of essays is dedicated to a recently deceased philosopher and humanist Nalin Ranasinghe. His central philosophical and humanistic preoccupation was with the human soul. Not surprisingly, his greatest inspiration was Socrates' credo: Care for your soul, and the title of his first book was *The Soul of Socrates*. In this and his later writings, Ranasinghe expressed his growing concern over the idea that the human soul has been hijacked due to the way our civilization has developed. The highest and noblest aspirations of our civilization have been replaced by our obsession with money, pleasure, and power. We now live in a time where we do not know who we are nor who the people around us are. Despite all of the technical gadgets connecting us virtually, this is the age of disconnect and loneliness, as well as of the degradations of humanity. Ranasinghe insisted that the two keys for recovery are the self-knowledge of the soul and a continuous dialogue with others. We need to relearn how to relate to ourselves and others as unique individuals, not as objects for the satisfaction of our needs. Following his ideas, the twenty essays presented here are divided into two parts: the soul in reflection and the soul in dialogue. The contributors come from various countries around the globe and work in different disciplines, and their chapters aim to revive our interest in the soul and the obscured core of our humanity. This book will appeal to undergraduate and graduate students of philosophy; however, the essays are written in a non-technical language, also making them accessible to the general audience.

Technology, Media Literacy, and the Human Subject Richard S. Lewis, 2021-06-03 Media literacy is often focused on evaluating the message rather than reflecting on the medium. Bringing together postphenomenology, media ecology, posthumanism, and complexity theory, Richard Lewis's book offers a method for such a reflection and shows how our everyday media environments constitute us as post-human subjects, one that is becoming and constitutes through relations, also with our media technologies. An original interdisciplinary effort, including for example the term intrasubjective mediation, and a must-read book for everyone interested in how we become with and through technologies. Prof. Mark Coeckelbergh, University of Vienna. *Technology, Media Literacy, and the Human Subject* is a clearly and concisely written book that employs a fruitful transdisciplinary approach. It

at once offers an excellent grounding in the literature whilst simultaneously developing a useful tool for students to reflect deeply and critically upon their own engagement with media Thoroughly recommended Alexander Thomas University of East London What does it mean to be media literate in today's world How are we transformed by the many media infrastructures around us We are immersed in a world mediated by information and communication technologies ICTs From hardware like smartphones smartwatches and home assistants to software like Facebook Instagram Twitter and Snapchat our lives have become a complex interconnected network of relations Scholarship on media literacy has tended to focus on developing the skills to access analyze evaluate and create media messages without considering or weighing the impact of the technological medium how it enables and constrains both messages and media users Additionally there is often little attention paid to the broader context of interrelations which affect our engagement with media technologies This book addresses these issues by providing a transdisciplinary method that allows for both practical and theoretical analyses of media investigations Informed by postphenomenology media ecology philosophical posthumanism and complexity theory the author proposes both a framework and a pragmatic instrument for understanding the multiplicity of relations that all contribute to how we affect and are affected by our relations with media technology The author argues persuasively that the increased awareness provided by this posthuman approach affords us a greater chance for reclaiming some of our agency and provides a sound foundation upon which we can then judge our media relations This book will be an indispensable tool for educators in media literacy and media studies as well as academics in philosophy of technology media and communication studies and the post humanities

Essays in Post-Critical Philosophy of Technology Mihály Héder,Eszter Nádasí,2019-02-15

Technology in all its forms has had and continues to have an indisputable impact on society and culture Philosophy of technology seeks to understand this impact and the meaning of technology for society and culture Although its origins can be traced back to the Greeks it wasn't until the late 19th century to the beginning of the 20th century that it gained ground as a philosophical discipline Now more than ever it is considered an essential philosophical enterprise The Budapest Workshop on Philosophy of Technology was a lively and successful event that sought to discuss reflect on and apply this branch of philosophical inquiry to both historical and contemporary examples Importantly the contributors methodological approaches were influenced by although not limited to Michael Polanyi's term post critical Moving beyond the rigidity of past approaches the selected essays were driven by two lines of inquiry what has been the historical role of technology in social and scientific change And how can a post critical approach enhance and extend our understanding of philosophy of technology This edited volume begins by exploring the role of technology in social and scientific developments from a historical perspective before moving towards a discussion of philosophy of technology from a Post Critical epistemic stance Free from the constraints of previous methodologies the third part of this work engages with the term Post Critical in its broadest sense The contributors to this section consider the phenomenology of the body and the influence of technology on our lives Finally the four concluding chapters of this book apply this philosophical approach to a wide range of contemporary problems from Decision Support Systems to Crisis Communication

At the Edge of AI Libuše Hannah Veprek,2024-08-02

How are human computation systems developed in the field of citizen science to achieve what neither humans nor computers can do alone Through multiple perspectives and methods Libuše Hannah Veprek examines the imagination of these assemblages their creation and everyday negotiation in the interplay of various actors and play science entanglements at the edge of AI Focusing on their human technology relations this ethnographic study shows how these formations are marked by intraversions as they change with technological advancements and the actors goals motivations and practices This work contributes to the constructive and critical ethnographic engagement with human AI assemblages in the making Animal Constructions and Technological Knowledge Ashley Shew,2017-09-20 Animal studies literature and its public consumption have sparked interest in questions about humanity Most scholars aim these studies to help us sort out how we should regard other creatures and how we should understand ourselves in light of their capacities This book offers something a little

different investigating the conceptual limits of tool use and technology through the lens of technological knowledge Making sense of animal studies can be tricky because of long held and culturally pervasive beliefs and messages about human triumph over nature where animals are considered to be part of nature Animal Constructions and Technological Knowledge considers animal tool use techniques and construction within the context of theories about what constitutes technology and what constitutes knowledge With reference to an engaging variety of animal case studies primarily from research on apes dolphins and crows this book shows how concepts from philosophy of technology can be used to make better sense of the animal cases These animal cases also help us to refine our philosophical concepts creating more careful distinction and uniting different accounts of technological knowledge Human Factors in Accessibility and Assistive Technology Matteo Zallio, 2022-07-24 Human Factors in Accessibility and Assistive Technology Proceedings of the 13th International Conference on Applied Human Factors and Ergonomics AHFE 2022 July 24 28 2022 New York USA The Reality of Human Life Bedrich V.
