Essays On Actions And Events Philosophical Essays Volume 1:

Essays on Actions and Events Donald Davidson, 2001-09-27 Donald Davidson has prepared a new edition of his classic 1980 collection of *Essays on Actions and Events* including two additional essays *Essays on Davidson* Bruce Vermazen, Merrill B. Hintikka, 1986 This collection brings together previously unpublished works by well known philosophers on the philosophy of action the metaphysics of causality and the philosophy of psychology Nine of the essays directly discuss Donald Davidson's work on these topics while three others challenge a Davidsonian approach through discussion of independent but related issues These essays are followed by replies from Davidson including a previously unpublished essay *Adverbs of Action* *Essays on Actions and Events* Donald Davidson, 2001-09-27 Donald Davidson has prepared a new edition of his classic 1980 collection of *Essays on Actions and Events* including two additional essays In this seminal investigation of the nature of human action Davidson argues for an ontology which includes events along with persons and other objects Certain events are identified and explained as actions when they are viewed as caused and rationalized by reasons these same events when described in physical biological or physiological terms may be explained by appeal to natural laws The mental and the physical thus constitute irreducibly discrete ways of explaining and understanding events and their causal relations Among the topics discussed are freedom to act weakness of the will the logical form of talk about actions intentions and causality the logic of practical reasoning Hume's theory of the indirect passions and the nature and limits of decision theory The introduction cross references and appendices emphasize the relations between the essays and explain how Davidson's views have developed *Eastern Christian Approaches to Philosophy* James Siemens, Joshua Matthan Brown, 2022-10-05 With few exceptions the field of Eastern Christian studies has primarily been concerned with historical critical analysis hermeneutics and sociology For the most part it has not attempted to bring Eastern Christian philosophy into serious engagement with contemporary thought This volume seeks to redress the matter by bringing the Eastern Christian tradition into a meaningful dialogue with contemporary philosophy It boasts a diverse group of scholars specialists in ancient philosophy analytic philosophy and continental philosophy who engage with a wide range of pressing issues Among other things it addresses such topics as contemporary atheism the metaphysics of action religious epistemology the philosophy of language bioethics the philosophy of race and human rights In so doing it aims to introduce contemporary readers to unique perspectives and novel arguments often overlooked by mainstream anglophone philosophy *New Essays on the Explanation of Action* C. Sandis, 2008-11-28 These previously unpublished essays present the newest developments in the thought of philosophers working on action and its explanation focusing on a wide range of interlocking issues relating to agency deliberation motivation mental causation teleology interpretive explanation and the ontology of actions and their reasons *A Deweyan Philosophical Take on Emotions* Dina Mendonça, 2024-09-03 This book puts forward a layered theory of emotions which argues that emotional processes are best understood as occurrences that happen within

complex emotional situational scenarios that integrate different and interconnected layers According to this theory there is an underlying logic of emotions which is more akin to a creative endeavor than to a fixed and mechanical structure The book is divided in three parts The first part provides the Deweyan historical background and shows how it gives rise to the hypothetical suggestion of the Layered Theory of Emotions After laying down the Layered Theory of Emotions the following chapters show how Dewey's philosophical work grounds the theoretical suggestion The second part of the book presents various insights that spring from the proposed theory Among other things it will show the importance of some new distinctions such as meta emotions and emotional depth and provide a different understanding of previous emotional categories such emotional intentionality and emotional habits Finally the third part of the book concludes by drawing some consequences of the layered theory of emotions for philosophy of mind and for the general philosophical task The book hopes to raise thought provoking questions and point out possible future research directions to deepen Dewey's insightful scholarship and Emotion Theory

The Theory of Mind Under Scrutiny Teresa Lopez-Soto, Alvaro Garcia-Lopez, Francisco J. Salguero-Lamillar, 2024-01-01 This book is a call to expand and diversify our approach to the study of the human mind in relation to the Theory of Mind It proposes that it is necessary to combine cross disciplinary methods to arrive at a more complete understanding of how our minds work Seeking to expand the discussion surrounding the Theory of Mind beyond the field of psychology and its focus on our capacity to ascribe mental states to other people this volume collects evidence and research to point to a more holistic understanding of our own minds the minds of others behavior language and reasoning This book therefore illuminates the conceptual intricacy underlying the Theory of Mind It posits that a wide scope is necessary to make a breakthrough in scientific research towards a full understanding of the nature function and development of our capacity to converge on biological processes of the brain towards consciousness emotion awareness and cognition The volume presents methods results critiques and models intended to provoke debates in various academic disciplines It is of interest to scholars working in psychology neuroscience philosophy of mind and artificial intelligence

A Companion to Free Will Joseph Keim Campbell, Kristin M. Mickelson, V. Alan White, 2023-07-05 Provides a comprehensive cutting edge and accessible accompaniment to various narratives about free will *A Companion to Free Will* is an indispensable resource for anyone interested in the philosophy of free will offering an authoritative survey of perennial issues and contemporary debates within the field Bringing together the work of a diverse team of established and younger scholars this well balanced volume offers innovative perspectives and fresh approaches to the classical compatibility problem moral and legal responsibility consciousness in free action action theory determinism logical fatalism impossibilism and much more The Companion's 30 chapters provide general coverage of the discipline as well as an in depth exploration of both CAP Classical Analytic Paradigm and non CAP perspectives on the problem of free will and the problem of determinism raising new questions about what the free will debate is or should be about Throughout the book coverage of modern exchanges

between the world's leading philosophers is complemented by incisive commentary, novel insights and selections that examine compatibilist, libertarian and denialist viewpoints. Offers a balanced presentation of conflicting theories and ongoing debates about the nature, existence and implications of free will. Explores the role of scientific advances and empirical methods in contributing to discourses on free will and action theory. Reviews new developments in longstanding arguments between compatibilist and incompatibilist approaches to free will, including those that question this way of framing the debate and critique the standard terminology. Discusses descriptive, revisionary and pragmatic approaches for defining key concepts and addressing compatibility problems surrounding free will. Considers various issues of moral responsibility and philosophical approaches to the problem of free will in new ways. Part of the acclaimed Blackwell Companions to Philosophy series. A Companion to Free Will is essential reading for undergraduate and graduate students of philosophy, professional philosophers and theorists, and interested novices alike.

Atoms And Persons: The Search For A Consistent View Of The Physical And Humanistic Perspectives Rodolfo Gambini, Jorge Pullin, 2022-08-18. What is consciousness? Does free will exist? There exists a widespread conviction that the recent scientific discoveries, especially those related to physics and biology, in particular in contemporary neurosciences, question the traditional attempts to give meaning to life and a basis for our moral compass. Current scientific thinking usually identifies the mind with the mere exchange of electrical signals among neurons. It claims that consciousness is an irrelevant epiphenomenon and that introspection is an unreliable instrument to achieve any form of knowledge. Also that the physical universe is causally closed and therefore all that occurs only has physical causes and all kind of freedom is excluded. The problem of assigning meaning and purpose to our lives, to the essential conceptions of the value of human life and social justice, becomes practically insoluble if one accepts the predominant notions that supposedly stem from contemporary science. The clash between the scientific and humanistic conception of human beings seems to have no option but to abandon the latter. The aim of this book is to show that, contrary to what is usually considered, current advances in science allow to re-evaluate the role of consciousness and human freedom without entering into contradiction with empirical evidence or scientific theories in place today. The book starts by analyzing the certainties provided by the scientific thought and philosophical reflection while discussing the role and content of physical theories and, in particular, quantum mechanics. It discusses in detail the nature of quantum objects and the role they may have in consciousness. In particular, it analyzes models that allow phenomena of quantum nature to manifest themselves in the brains of animals and humans and account for many of the properties of consciousness. Finally, we analyze how self-conscious and free entities like persons emerge, making compatible the scientific view with a renewed and better supported way of perceiving people, their values and culture.

Contemporary Materialism Paul K. Moser, J. D. Trout, 2002-11. Bringing together for the first time many key articles by leading philosophers, this volume charts the problems, positions and themes concerning the issue of materialism.

Clinical Neurotechnology meets Artificial Intelligence Orsolya

Friedrich, Andreas Wolkenstein, Christoph Bublitz, Ralf J. Jox, Eric Racine, 2021-03-03 Neurotechnologies such as brain computer interfaces BCIs which allow technical devices to be used with the power of thought or concentration alone are no longer a futuristic dream or depending on the viewpoint a nightmare Moreover the combination of neurotechnologies and AI raises a host of pressing problems Now that these technologies are about to leave the laboratory and enter the real world these problems and implications can and should be scrutinized This volume brings together scholars from a wide range of academic disciplines such as philosophy law the social sciences and neurosciences and is unique in terms of both its focus and its methods The latter vary considerably and range from philosophical analysis and phenomenologically inspired descriptions to legal analysis and socio empirical research This diversified approach allows the book to explore the entire spectrum of philosophical normative legal and empirical dimensions of intelligent neurotechnologies Philosophical and legal analyses of normative problems are complemented by a thorough empirical assessment of how BCIs and other forms of neurotechnology are being implemented and what their measurable implications are To take a closer look at specific neurotechnologies a number of applications are addressed Case studies previously unidentified issues and normative insights on these cases complement the rich portrait this volume provides Clinicians philosophers lawyers social scientists and engineers will greatly benefit from the collection of articles compiled in this book which will likely become a standard reference work on the philosophy of intelligent neurotechnologies Oxford Studies in Philosophy of Mind Volume 3 Uriah Kriegel, 2023 Oxford Studies in Philosophy of Mind presents cutting edge work in the philosophy of mind combining invited articles and articles selected from submissions Each volume will highlight two themes to bring focus to debates The series will reflect the diversity of methods adopted in contemporary philosophy of mind and provide a venue for rigorous and innovative work by both established and up and coming voices in the field The themes covered in the third volume are mind and science sensory experience and the philosophy of mind of Margaret Cavendish and C A Strong It also contains a book symposium on David Papineau's *The Metaphysics of Sensory Experience* **Advances in Neurophilosophy** Nora Heinzelmann, 2024-02-22 Bringing together recent case studies and insights into current developments this collection introduces philosophers to a range of experimental methods from neuroscience Chapters provide a comprehensive survey of the discipline covering neuroimaging such as EEG and MRI causal interventions like brain stimulation advanced statistical methods and approaches drawing on research into the development of human individuals and humankind A team of experts combine clear explanations of complex methods with reports of cutting edge research advancing our understanding of how these tools can be applied to further philosophical inquiries into agency emotions enhancement perception personhood and more With contributions organised by neuroscientific method this volume provides an accessible overview for students and scholars coming to neurophilosophy for the first time presenting a range of topics from responsibility to metacognition

Qualia and Mental Causation in a Physical World Terence Horgan, Marcelo Sabates, David Sosa, 2015-03-05 How

does mind fit into nature Philosophy has long been concerned with this question No contemporary philosopher has done more to clarify it than Jaegwon Kim a distinguished analytic philosopher specializing in metaphysics and philosophy of mind With new contributions from an outstanding line up of eminent scholars this volume focuses on issues raised in Kim s work The chapters cluster around two themes first exclusion supervenience and reduction with attention to the causal exclusion argument for which Kim is widely celebrated and second phenomenal consciousness and qualia with attention to the prospects for a functionalist account of the mental This volume is sure to become a major focus of attention and research in the disciplines of metaphysics and philosophy of mind *Advances in Experimental Philosophy of Action* Paul Henne, Samuel Murray, 2023-04-20 What is self control Does a person need to be conscious to act Are delusions always irrational Questions such as these are fundamental for investigations into action and rationality as well as how we assign responsibility for wrongdoing and assess clinical symptoms Bridging the gap between philosophy and psychology this interdisciplinary collection showcases how empirical research informs and enriches core questions in the philosophy of action Exploring issues such as truth moral judgement agency consciousness and cognitive control chapters offer an overview of the current state of research present new empirical findings and identify where future experimental work can further advance the frontier between philosophy and psychology This is an essential resource for anyone looking to better understand how science and philosophy can meaningfully inform our knowledge of human agency *The Foundations of History* Stephen Leach, 2017-01-24 This book provides an exposition and critical examination of Collingwood s philosophy of history in which Collingwood s views are read in the light of his metaphilosophy Collingwood s philosophy of history is also located in relation to recent and current philosophy Although the author argues that Collingwood s conception of the subject matter of history may require some revision he is generally sympathetic to the aims and methods of Collingwood s project Indeed the author hopes to demonstrate that these aims and methods are still of great value **The Bloomsbury Handbook of the Philosophy of the Historical Sciences and Big History** Aviezer Tucker, David Cernín, 2025-08-21 This handbook examines the philosophy of the historical sciences and their synthesis in concepts like Big or Deep History Written by interdisciplinary philosophers historians and scientists it acts as a valuable guide for anybody interested in scientific knowledge of the deep past Big History and the philosophy of science The Bloomsbury Handbook of the Philosophy of the Historical Sciences and Big History is the first philosophical reference work to recognize that History is not what it used to be the historical sciences Deep History Big History and even the history of the Anthropocene have now expanded the scope of historiography beyond that of literate civilizations to cover all scientific inferences about the past from the Big Bang through the history of the planet and the history of life to the history of humanity Different views about the scope of History have ontological epistemic methodological explanatory ethical and educational reasons and implications The historical sciences and the knowledge they have generated are founded on theories of knowledge of the past epistemology of history The contributions in this book

consider whether there are common epistemic properties to all the historical sciences that distinguish them from non historical or theoretical sciences The first part of the handbook examines the recent expansion of the scope of the historical sciences in Big History natural history global history and environmental history and older broader concepts of history like universal history and philosophy of history The second part of the handbook addresses the ontology and epistemology of the past including the basic concepts of the historical sciences such as origins the end of history determination and underdetermination contingency and necessity historical predictions and counterfactuals and historical pseudoscience The third part examines the philosophies of the special historical sciences historical linguistics textual criticism geology evolutionary biology systematics archaeology cosmology history of the environment and most significantly their integrations and combinations for example how genetics archaeology and historical linguistics have generated a whole new knowledge of deep human history This collection offers an overview of what the philosophy of the historical sciences is and is becoming for students and experts alike

Design Technology and Digital Production Gabriel Esquivel, 2024-03-26 This book is a rigorous account of architecture s theoretical and technological concerns over the last decade The anthology presents projects and essays produced at the end of the first digital turn and the start of the second digital turn This anthology engages and deploys a variety of discourses topics criteria pedagogies and technologies including some of today s most influential architects practitioners academics and critics It is an unflinchingly rigorous and unapologetic account of architecture s disciplinary concerns in the last decade This is a story that has not been told in recent years everything has been refracted through the prism of the post digital generation Design Technology and Digital Production illustrates the shift to an architectural world where we can learn with and from each other develop a community of new technologies and embrace a design ecology that is inclusive open and visionary This collection fosters a sense of shared experience and common purpose along with a collective responsibility for the well being of the discipline of architecture as a whole

The Tinkering Mind Tillmann Vierkant, 2023-01-06 Epistemic agency is a crucial concept in many areas of philosophy and cognitive sciences But what is it The Tinkering Mind argues that epistemic agency has two distinct incompatible definitions intentional mental action or a distinct non voluntary form of evaluative agency both of which lead to surprising counterintuitive consequences
