Time, Energy and Stone Tools Robin Torrence, 1989-08-25 This collection aims to refocus archaeological and anthropological interest in technology

Style and Function Teresa D. Hurt, Gordon Rakita, 2000-10-30 The topics of style and function within evolutionary archaeology have been the subject of great debate in the field of archaeology in general over the past two decades Evolutionary archaeologists have a unique perspective on these concepts one that has sometimes been misunderstood by archaeologists working within other theoretical perspectives The dichotomy between style and function was first formulated in the late 1970s by Robert Dunnell and remains axiomatic within the theoretical perspective of evolutionary archaeology The original definitions of style and function were grounded in biological evolutionary concepts regarding neutral variation versus variation that is subject to natural selection Several chapters expand upon these concepts and explore how Darwinian evolutionary theory may be used to understand the archaeological record Other chapters demonstrate this application through empirical case studies Dunnell provides a foreword introducing and re examining his original thesis This volume is the only text devoted to the topic of style and function within the literature of evolutionary archaeology It provides not only theoretical discussions and augmentation but

also significant historical background regarding the development of the style function distinction within archaeology Moreover it presents several case studies that provide examples of how evolutionary style and function may be applied to the prehistoric record

Evolutionary Archaeology Patrice A. Teltser, 2022-05-10 What is the role of neo Darwinian evolution in explaining variation in prehistoric behavior Evolutionary Archaeology a collection of nine papers from a variety of contributors is the first book length treatment of the evolutionists position All archaeologists and especially those with a specific interest in method and theory will find much here to challenge traditional theory solidify the evolutionists position and stir further debate Evolutionary archaeologists argue that Darwinian natural selection acts on human behavior resulting in the persistence of alternative human behaviors and the material products of those behaviors The contributors address the methodological requirements of evolutionary theory as it may apply to the nature of archaeological data Several contributors evaluate the methodological implications of basic evolutionary principles including the structure of explanations the units of evolution and analysis and the measurement of information transmission Others explore the role of specific analytic approaches such as seriation raw material sourcing and comparative and engineering analyses Still others confront the issue of reformulating archaeological problems from the point of view of evolutionary theory By focusing on the methodological requirements of evolutionary theory these essays go far in meeting the challenge of building new archaeological method The work contributes to a better understanding of cultural evolution and builds toward a new logical framework to explain variation in the archaeological record

Artefacts as Categories Daniel Miller, 1985-11-14 The aim of Artefacts as Categories is to ask what we can learn about a society from the variability of the objects it produces Dr Miller presents a comprehensive analysis of the pottery produced in a single village in central India drawing together and analysing a whole range of aspects technology function design symbolism and ideology that are usually studied separately Using the concepts of pragmatics framing and ideology the author points to the insufficiency of many ethnographic accounts of symbolism and underlines the need to consider both the social positioning of the interpreter and the context of the interpretation when looking at artefacts His invigorating study cogently questions many assumptions in material culture studies and offers a whole range of fresh explanations Archaeologists in particular will welcome the discussion of familiar materials such as pottery rim shapes body forms and decoration However the book will have a broad appeal to researchers in cultural studies social anthropology and psychology and will attract all those interested in the problem of relating objects and society
