The Evolution of Organ Music in the 17th Century John R. Shannon, 2014-01-10 The 17th century was the century of the organ in much the same way the 19th century was the century of the piano Almost without exception the major composers of the century wrote for the instrument and most of them were practicing organists themselves This historical book surveys analyzes and discusses the major national styles of 17th century European organ music Due to the extraordinarily extensive body of literature produced during this 100 year period this text includes 350 musical examples to illustrate the various styles The book also includes

brief discussions of the various national styles of organ building an appendix about the various notational methods used in the 17th century and a chapter on Spain and Portugal written by Andre Lash an expert on the subject *Immediacy and Reflection in Kierkegaard's Thought* Paul Cruysberghs, Johan Tael, Karl Verstryng, 2003 We live in a reflective age That is Soren Kierkegaard s overall conclusion when evaluating the time he lives in But his appraisal contains both approval and criticism On the one hand reflection is a necessary category to deal with the dynamics and the qualities of the modern age on the other hand it bears a great danger It is Kierkegaard s firm conviction that reflection should always relate to a kind of immediacy that safeguards it from becoming hollow and detached from our existential reality Throughout the voluminous and complex work of Kierkegaard the notions of immediacy and reflection play a crucial role They appear in such an early work as *From the Papers of One Still Living* as well as in the late *Anti Climacus* writings and indeed their significance or influence can be felt in all philosophical texts published in between That is not to say that the meaning of the notions is unequivocal After all Kierkegaard not only uses the terms in very divergent contexts but his own understanding of them appears to evolve quite strongly in the course of his oeuvre Moreover in spite of their clearly philosophical character the two notions play an unmistakable role in Kierkegaard s understanding of religion They appear frequently in the religious discourses indeed In short Kierkegaard s use of the notions of immediacy and reflection covers a broad array of meanings and interpretations The dialectics of immediacy and reflection of reflection killing immediacy and raising the question of the possibility of a new immediacy is the main theme of *Immediacy and Reflection in Kierkegaard s Thought* The book contains contributions authored by a number of well known Kierkegaard scholars Kierkegaard s theory of the existence spheres of life provides a first viewpoint on the interplay of immediacy and reflection Here the philosophical and pseudonymous writings are the main subject of research If on the other hand one pays a closer look at the significance of a second immediacy for a religious attitude to life The religious discourses come into play when the possibility of a second immediacy is taken into consideration In conclusion the theme of immediacy and reflection is connected to some important trends in the modern and contemporary era On the one hand it is linked to the philosophical influences Kierkegaard underwent e g from Hegel on the other hand Kierkegaard is confronted with later thinkers Heidegger in particular **Come Unto Him** Knitske, 1860 *Bibliographic Guide to Music* New York Public Library. career he studied with Cherubini His first works were not a success but *La Berg re Ch teleine* 1820 written at the age of 38 established him as an operatic composer He then met the librettist Eug ne Scribe 1791 1861 with whom he developed a working partnership one of the most successful in musical history that lasted until Scribe s death After *Le Ma on* 1825 and *La Muette de Portici* 1828 Auber s life was filled with success In 1829 he was appointed a member of the Institut in 1839 Director of Concerts at Court in 1842 Director of the Conservatoire in 1852 Musical Director of the Imperial Chapel and in 1861 Grand Officer of the L gion d Honneur Auber s famous historical grand opera *La Muette de Portici* also known by its hero s name as *Masaniello* is a key work in operatic history and helped to inspire the 1830 revolution in Brussels that led to the separation of Belgium from Holland Auber himself experienced four French Revolutions 1789 1830 1848 1870 The latter the Commune hastened the end of his life He died on 12 May 1871 at the advanced old age of 89 and in the pitiful conditions of civil strife after a long and painful illness which worsened during the Siege of Paris He had refused to leave the city he had always loved despite the dangers and privation even after his house had been set on fire by the *petroleurs et petroleuses* By some irony a mark had been placed against the house of the composer of *Masaniello* the very voice of Romantic liberty Auber s overtures were once known everywhere a staple of the light Classical repertoire The influence of his gracious melodies and dance rhythms on piano and instrumental music and on the genre of Romantic comic opera especially in Germany was overwhelming The operas themselves apart from *Fra Diavolo* 1830 have virtually passed out of the repertoire since Auber s elegant and restrained art now has little appeal for the world of music attuned as it is to the meatier substance of verismo high Wagnerian ideology and twentieth century experimentalism *Le Cheval de bronze* was premiered at the Op ra Comique on 23 March 1835 It was described as an op ra f erique in three acts The librettist Scribe derived the plot from the tale *Les Sept Fils du Calender* in *The Arabian Nights* The scene is set in Shantung province in China in legendary times The magical Bronze Horse of the title which has appeared mysteriously on a nearby hill will transport any man who climbs onto its back to the planet Venus where a group of female sirens led by the lovely Princess Stella live If the traveller in space can resist the sirens advances he can return to earth with the lady of his choice if not he is whisked back alone and turned to stone if he speaks of his experiences The witty libretto that with its exotic subject perfectly captured the taste of the time offers differentiated characterizations much situational comedy and some eroticism in the Venus scenes The score is among Auber s best achievements brimming over with invention fantasy and comedy are captured perfectly while the big love duets allow the expression of genuine feeling to break through the burlesque situations The exotic and fairytale tone is achieved without obvious musical chinoiserie being rather transmuted into instrumental and harmonic richness especially in the big ensembles This is one of the most precisely and carefully controlled of all the composer s scores The sense of detail and care is everywhere apparent as in the short but beautifully crafted entr actes to acts 2 and 3 The ensembles in act 1 especially the brilliant quintet and the act 2 finale are remarkable The thematic integration is extraordinary and in some instances achieves

a genuine use of Leitmotif The overture presents all the essential elements of the story in powerful symbolic summary It is dominated by the central image of the Bronze Horse the agent of magical adventure and transformation The enterprising P ki as the heroine and a redemptrix figure shares something of the Horse s dynamism The most obvious motif of the Bronze Horse and its magic power comes from P ki s act 1 ballad in which she explains the mysterious presence of the mythical creature on its high promontory L bas sur ce rocher sauvage The roles were created by Auguste F r ol Tsing Sing Louis Beno t Alphonse R vial Prince Yang Jean Francois Inchindi Hinnekindt Tch in Kao tienne Bernard Auguste Th nard Yanko F licit Pradher P ki Sophie Ponchard Tao Jin Marie Casimir Princess Stella and Mlle Fargueil Lo Mangli The opera was initially a hit with 84 performances in the first year and over the next few years was staged in numerous countries from London Covent Garden 1835 to Russia St Petersburg 1837 and the United States New York 1837 but then sank into an undeserved obscurity The work was revived in expanded form at the Op ra on 21 September 1857 and famously by Engelbert Humperdinck at Karlsruhe in his own arrangement 10 November 1889 It was performed in concert in Vienna 1953 Berne 1969 and Paris 1979 This edition reproduces the vocal score published in Paris by E Troupenas 1835 **The New Werner Twentieth Century Edition of the Encyclopaedia Britannica** ,1907 **The Musical World** ,1855 American Machinist ,1952-07
