Bastos, Joana Fernandes, 2005-12-28 The IAG International Symposium on Gravity, Geoid and Space Missions 2004 GGSM2004 was held in the beautiful city of Porto, Portugal, from 30 August to 3 September 2004. This symposium encompassed the themes of Commission 2 Gravity Field of the newly structured IAG as well as interdisciplinary topics related to geoid and gravity modeling, with special attention given to the current and planned gravity dedicated satellite missions. The symposium also followed in the tradition of mid-term meetings that were held between the quadrennial joint meetings of the International Geoid and Gravity Commissions. The previous mid-term meetings were the International Symposia on Gravity, Geoid and Marine Geodesy Tokyo 1996 and Gravity, Geoid and Geodynamics Banff 2000. GGSM2004 aimed to bring together scientists from different areas in the geosciences working with gravity and geoid related problems, both from the theoretical and practical points of view. Topics of interest included the integration of heterogeneous data and contributions from satellite and airborne techniques to the study of the spatial and temporal variations of the gravity field. In addition to the special focus on the CHAMP, GRACE and GOCE satellite missions, attention was also directed toward projects addressing topographic and ice field mapping using SAR, LIDAR and laser altimetry, as well as missions and studies related to planetary geodesy. **Cumulated Index Medicus**, 1999 **Medical and Health Care Books and Serials in Print**, 1997 [Journal of the Medical Association of Georgia](#) Medical Association of Georgia, 1996 Vols for 1913-54 include the Association's Roster of members. **Adler's Physiology of the Eye E-Book** Leonard A.
