Lockley,Spencer G. Lucas,2014-11-01 Encyclopedia of Criminological Theory Francis T. Cullen,Pamela Wilcox,2010-09-23 Consistently excellent The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond Adam Tocock Reference Reviews In discussing a criminology topic lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on as if assuming their student audience possesses

the necessary background to appreciate and integrate the reference. However, university reference librarians can tell you this is often far from the case. Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics: the who, what, where, how, and why, if you will. And reference librarians often find it difficult to guide these students to a quick one-stop source. In response, SAGE Reference is publishing the two-volume *Encyclopedia of Criminological Theory*, available in both print and electronic formats. This serves as a reference source for anyone interested in the roots of contemporary criminological theory. Drawing together a team of international scholars, it examines the global landscape of all the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses. In addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might find in a handbook. And like an unabridged dictionary, it provides concise-to-the-point definitions of key concepts, ideas, schools, and figures. Coverage will include contexts and concepts in criminological theory, the social construction of crime, policy implications of theory, diversity and intercultural contexts, conflict theory, rational choice theories, conservative criminology, feminist theory.

**Registers of Loss** Rinos Mwanaka, 2022-03-11. My work takes the nature of interactive, collaborative, and multidisciplinary. I work across several art fields including, among others, literary fictions, novels, essays, poetry, play, short stories, songs, musical composition, singing, reciting, mbira, marimba, keyboards, a little guitar, and visual drawings, paintings, photography, collages, mixed media, installation, etc. I am interested in connection, convergence, community, and cooperation following disparate, sometimes disfigured experiences, seeing how they can come together or shy away from each other to create new wholes. The baobab trees are ancient trees, some might be thousands of years old. Imagine the people who have stayed in these dwellings, who have ate the fruits of these trees, who have used its leaves as relish. We create mashed okra relish with baobab leaves. The ailments treated by its bark. Every part of this succulent tree is useful. In this photo journey, I learned a lot more about these beautiful souls. They have a tendency to create musical lines, mostly linear. It's like one tone starting, fading, and letting the next tone to take over, and this will fade and let another tone to take over, such that you can see the lines how they conjoin to create music beyond human understanding. And most of the Baobabs I realized inhabit the same place in numbers, and usually they are on high grounds, like Gods who love elevated dwellings, and they look down upon other small humans, small trees, humans, etc. but there are also some singular baobabs that inhabit lower grounds, and most of these are solitary, and from my memory growing up here, these don't bear fruits. And whilst I was photographing the Baobabs, several story strands in my head converged around one far much more important issue: the issue of Climate Change and Global Warming. In *Registers of Loss*, I encourage working together as human beings to arrest global warming and climate change the way the baobabs work together to communicate in linear notes or in community thoughts.

**Human Footprints: Fossilised Locomotion?** Matthew R. Bennett, Sarita A. Morse, 2014-08-20. Human footprints provide some of the most emotive and tangible evidence of our ancestors. They provide evidence of stature, presence,

behaviour and in the case of early hominin footprints evidence with respect to the evolution of human gait and foot anatomy While human footprint sites are rare in the geological record the number of sites around the World has increased in recent years along with the analytical tools available for their study The aim of this book is to provide a definitive review of these recent developments with specific reference to the increased availability of three dimensional digital elevation models of human tracks at many key sites The book is divided into eight chapters Following an introduction the second chapter reviews modern field methods in human ichnology focusing on the development of new analytical tools The third chapter then reviews the major footprint sites around the World including details on several unpublished examples Chapters then follow on the role of geology in the formation and preservation of tracks on the inferences that can be made from human tracks and the final chapter explores the application of this work to forensic science Audience This volume will be of interest to researchers and students across a wide range of disciplines sedimentology archaeology forensics and palaeoanthropology

**Revisiting National Security** Prabhakaran Paleri, 2022-05-10 This book examines the evolving concept of national security and how human systems could be governed in an ever turbulent and dynamic world It takes a revised look at the concept of national security previously researched and identified by the author based on the present context but with a futuristic appreciation of governance primarily national but extended to global perspectives in the modern and dynamically shifting world The book emphasises the need for governments to maximise national security for the well being of their people The concept of national security is taken as the key subject of national governance which is extendable to global governance wherein national security is not only the physical or military security alone but also the overall well being of the people of a nation This book explores how national security can be achieved by balancing its various elements in different terrains where the game of governance is played in national as well as global perspective It also presents additional findings and observations to show that the approach is transformative redefining the key knowledge paradigms This book is relevant for policy makers students researchers and academics who wish to explore and rethink their approach towards governing the human systems whose well being is the responsibility of governments *New York Times Saturday Review of Books and Art*

, 1970 C. Wright Mills and the Criminological Imagination Jon Frauley, 2016-03-03 In spite of its widespread use within criminology the term criminological imagination as derived from C Wright Mills classic *The Sociological Imagination* has yet to be fully developed and clarified as an analytic concept capable of guiding theorizing or empirical enquiry This volume with a preface by Elliot Currie engages with and reflects on this concept exploring C Wright Mills work for criminological enquiry Bringing together the latest work of leading scholars in the fields of criminology and sociology from around the world *C Wright Mills and the Criminological Imagination* investigates the emergence and lineage of a criminological concept indebted to Mills thought adapting and applying it to a specifically criminological context With attention to theoretical concerns and as well as the application of the criminological imagination in concrete empirical research this volume sheds new light on the

methodological and analytical aspects of the criminological imagination as a multifaceted concept and explores the possibilities that it offers for the emergence of an imaginative criminological practice As such it will appeal to scholars across the social sciences with interests in sociology and social theory criminology criminal justice studies law and research methods
