Third Series Library of Congress. Copyright Office, 1973 Economics and the Good Life Bertrand de Jouvenel, 2017-10-19 Bertrand de Jouvenel 1903 1987 was known in the United States primarily as a political scientist His best known works *On Power* *Sovereignty* and *The Pure Theory of Politics* all made distinctive contributions to our understanding of the modern state and to the creation of a political science capable of civilizing that state His work in the field of economics is relatively unknown in the United States but like many writers in the contemporary field of political economy de Jouvenel is not interested in expanding the claims of economy at the expense of polity On the contrary his thinking is governed by the oldest and most fundamental of political concerns the definition of the good life The good life is not a product of the marketplace but of deliberate and collective decision that is a task for thoughtful citizens and statesmen and not simply the sum of millions of separate and amoral consumer preferences De Jouvenel is well known for his opposition to the distended state but he was no anarchist His eloquent warnings to keep the state in its proper sphere were accompanied by a richly sophisticated discussion of what the proper sphere is an aspect of his work that comes through very clearly in this volume Written between 1952 and 1980 the essays range from a discussion of technology to reflections on such fundamental economic concepts as amenity and welfare They include the deeply theoretical as well as the practical and the concrete All are informed by de Jouvenel's insistence that a science which seeks to understand the production and distribution of goods must be concerned in the first place with the good itself *Economics and the Good Life* is a companion volume to *The Nature of Politics* *Selected Essays of Bertrand de Jouvenel* Like the earlier volume this collection is accompanied by an editor's introduction that places the essays in the wider context of de Jouvenel's work This work is essential to the libraries of economists political theorists historians and sociologists *Man East and West* Howard L. Parsons, 1975 **The Eclipse of Classical Thought in China and The West** James Gordley, 2022-06-09 Explores the strengths of the Chinese and Western classical traditions how they shaped constitutions and the impact of their decline

**Progress, Apocalypse, and Completion of History and Life after Death of the Human Person in the World Religions** P. Koslowski, 2013-03-09 The soul is so closely connected to life that one cannot think that it could ever be separated from life and consequently be mortal Therefore it can only be immortal This argument from Plato's *Phaedo* for the immortality of the soul exhibits both a great strength and a great weakness Its strength is that it is difficult for anyone to

think that the soul could ever exist without life Its weakness is first that not all religions accept a soul that remains the same as the center of the person thus one speaks for instance in Buddhism of a soulless theory of the human being and second that what is true does not depend on what we can think but on what we recognize in experience and thought The religions believe in the existence of a power that can work contrary to our experience that the soul in death is not separated from life How the religions believe they can establish this continued life after death and how faith in this life is related in the religions to the interpretation of history its progress its apocalyptic end and its eschatological completion and transfiguration is the theme of this book In the culture of the West in the nineteenth and twentieth centuries faith in the secular progress of the technological control of nature and the economic organization of society was the enemy of faith in the immortality of the soul
