Michael E. Gallery,Stephen C. Carey,2013-12-09 The purpose of this book is to help you put already existing performance criteria in a context of your organizational system and assist you in using the criteria to assess problems in your organization More importantly this book will help you in designing systemic solutions to the systemic problems you have identified with easy to use samples and questions that draw out key areas where the organization needs to improve Most organizations are not lacking in information what is most often lacking is a framework that leaders can use to organize and make sense of the information they have The authors provide such a framework through OPS They will also help readers engage in backwards thinking to identify and fix real world problems with practical solutions This book is not an answer book in the sense that we present a series of common problems and the accompanying answers To be sure many such books exist such as 101 Ideas for fill in the blank Most of these answers are based on someone s recollection of what they did to solve a problem The results of the solution measureable gains are seldom if ever reported This book provides a system for discovering your own problems developing solutions evaluating success and gathering information that will help to improve solutions should they fail on the first attempt It is based upon more than 30 years of research within the discipline of human performance improvement

Community Education for Social Justice Cameron White,2014-02-05 What is community How important is community in the 21st century Where might the idea of community fit in education and schooling teaching and learning These are the questions and themes embedded in this book The general critique is that community is an add on in our schools and often is dismissed as a result of the individualistic and competitive nature of schooling today Our focus is to provide critical investigations as to the possibility of community and that we need community now more than ever The concept of community

education brings many ideas and issues to mind Related themes include place based field based environmental service learning and outdoor education Each has its own more narrow focus with community education perhaps an umbrella term than encompasses them all Nevertheless the suggestion here is that instead of community education serving as an extension or add on to traditional approaches it should be the focus of all education What is often missing in teaching and learning are contexts and connections that make education meaningful Community education engages participants in problem and issues based approaches to the local community thereby facilitating that local to global link Instead of compartmentalized subjects integrated approaches use what students and the community know or understand to develop further questions solutions or even problems Community education offers efficacy in that it provides opportunities for collaboration in addressing local issues and problems It enables the community to become the classroom thus ensuring a more long term connection to active rather than passive endeavors as citizens
