*U.S. Militarism and the Terrain of Memory* John Bechtold, 2024-08-01 This book analyzes how the Iraqi city of Fallujah became registered as a setting for military heroics in American memory In 2004 the U S military conducted two disastrous assaults in Fallujah Iraq More than 1 000 citizens were killed and according to the military's own estimate upwards of 200 000 people were displaced because of the violence Yet despite this human catastrophe the kind of information that emerged in the public domain during the battle foregrounded the soldier's experience in war while effacing the destruction of Iraqi bodies This tendency to foreground the soldier body is a

direct result of the military's intervention in what they conceptualize as the information environment. This book draws from the second assault in Fallujah as a case study to explicate the military's investment in this perspectival space which is a consequence both of the mediatization of contemporary war and of the need to influence knowledge considered unfavorable to military operations. In short, the military enlists the media in their targeting process to produce information that is then deployed as persuasive force to modify the beliefs of specific target populations. When the cultural texts produced by the media are remediated in the public domain after war, they can be thought of as martial constructs because they originated during war through the military's systemized attempt to influence knowledge. That is, these texts trace to a specific battlefield objective. This book reframes the notion of propaganda as a generalized public relations strategy into a more acute and coordinated attempt to decontextualize specific knowledge in the information environment. This book will be of much interest to students of media and communication studies, war studies, memory studies, and international relations.

**Yuge!** G. B. Trudeau, 2016-07-05 A NEW YORK TIMES BEST SELLER. He tried to warn us. Ever since the release of the first Trump for President trial balloon in 1987, Doonesbury's Garry Trudeau has tirelessly tracked and highlighted the unsavory career of the most unqualified candidate to ever aspire to the White House. It's all there: the hilarious narcissism, the schoolyard bullying, the loathsome misogyny, the breathtaking ignorance, and a good portion of the Doonesbury cast has been tangled up in it. Join Duke, Honey, Earl, J.J., Mike, Mark, Roland, Boopsie, B.D., Sal, Alice, Elmont, Sid, Zonker, Sam, Bernie, Rev, Sloan, and even the Red Rascal as they cross storylines with the big orange airhorn who's giving the GOP such fits. Garry Trudeau is the sleazeball, third-rate talent who draws the overrated comic strip Doonesbury, which very few people read. He lives in New York City with his wife Jane Pauley, who has far more talent than he has.

**Guide to the Library of Congress Classification** Lois Mai Chan, Sheila S. Intner, Jean Weihs, 2016-09-26. Like earlier editions, this thoroughly updated sixth edition of the classic textbook provides readers with a basic understanding of the Library of Congress Classification system and its applications. The Library of Congress Classification system is used in academic, legal, medical, and research libraries throughout North America, as well as worldwide. Accordingly, catalogers and librarians in these settings all need to be able to use it. The established gold standard text for Library of Congress Classification, LCC, the sixth edition of *Guide to the Library of Congress Classification* updates and complements the classic textbook's coverage of cataloging in academic and research libraries. Clear and easy to understand, the text describes the reasoning behind assigning subject headings and subheadings, including use of tables, explains the principles, structure, and format of LCC details notation tables, assigning class numbers, and individual classes, and covers classification of special types of library materials. The last chapter of this perennially useful resource addresses the potential role of classification in libraries of the future.
