**We Are Best Friends: Animals in Society** Leslie Irvine,2019-10-01 Friendships between humans and non human animals were once dismissed as sentimental anthropomorphism After decades of research on the emotional and cognitive capacities of animals we now recognize human animal friendships as true reciprocal relationships Friendships with animals have many of the same characteristics as friendships between humans Both parties enjoy the shared presence that friendship entails along with the pleasures that come with knowing another being Both friends develop ways of communicating apart from or in addition to spoken language [Our Furry Friends](#) Scientific American Editors,2015-12-21 In the U S more than half of households have a pet usually more than one They're usually considered members of the family and some of us even call them our furry children The strength of the human pet bond tells us as much or more about ourselves as it does about our pets and in this eBook *Our Furry Friends The Science of Pets* we look at why dogs and cats behave the way they do and what makes our bond with them so strong In her opening article *Pets Why Do We Have Them* Daisy Yuhas discusses the variety of reasons for pet ownership including our emotional need to nurture other living things This emotional bond brings its own benefits such as social support and reduced stress making us happier and healthier How and why pets came to adopt

humans is another question entirely and two articles From Wolf to Dog and The Taming of the Cat look at the evolution of the human relationship with dogs and cats respectively Pets behavior is examined further in several articles including The World According to Dogs in which Julie Hecht deciphers what it means when a dog won't play and whether that guilty look really indicates a feeling of responsibility Meanwhile in The Inner Life of Cats Kate Wong investigates feline quirks such as why cats purr or bring their kills to their humans Finally all pet owners know that animals feel things and science is starting to agree As we learn in Do Animals Feel Empathy and When Animals Mourn many species grieve over the loss of relatives or close companions indicating that empathy and grief could have neural and evolutionary roots
