War and Rights David L Rousseau, 2021-04-13 Warfare in Europe contributed to the development of the modern state In response to external conflict state leaders raised armies and defended borders The centralization of power the development of bureaucracies and the integration of economies all maximized revenue to support war But how does a persistent external threat affect the development of a strong state The Garrison State hypothesis argues that states that face a severe security threat will become autocracies Conversely the Extraction School argues that warfare indirectly promotes the development of democratic institutions Execution of large scale war requires the mobilization of resources and usually reluctant populations In most cases leaders must extend economic or political rights in exchange for resolving the crisis Large scale warfare thus expands political participation in the long run The authors use empirical statistical modeling to show that war decreases rights in the short term but the longer and bigger a war gets the rights of the citizenry expand with the conflict The authors test this argument through historical case studies Imperial Russia
