Insights in Germanic Linguistics: Methodology in transition Irmengard Rauch, Gerald F. Carr, 1995 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by approaching language from an interdisciplinary perspective TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing Frisian Breaking Geert van der Meer, 1985 *Community Languages in the Netherlands* Guus Extra, Ludo Verhoeven, 2020-08-26 This book focuses on the international and educational context of ethnic communities and their language varieties in the Netherlands It presents major trends in Dutch research on community languages and cross cultural evidence on reported vs observed use of community languages at Dutch schools **Old English Breaking and its Germanic Analogues** Robert B. Howell, 2011-04-20 Over the past few decades the book series Linguistische Arbeiten Linguistic Studies comprising over 500 volumes has made a significant contribution to the development of linguistic theory both in Germany and internationally The series will continue to deliver new impulses for research and maintain the central insight of linguistics that progress can only be made in acquiring new knowledge about human languages both synchronically and diachronically by closely combining empirical and theoretical analyses To this end we invite submission of high quality linguistic studies from all the central areas of general linguistics and the linguistics of individual languages which address topical questions discuss new data and advance the development of linguistic theory

International Journal of the Sociology of Language, 1974 **Wieser Enzyklopädie: Bd. A-I** Harald Haarmann, 2008 Headhood, Elements, Specification and Contrastivity Philip Carr, Jacques Durand, Colin J. Ewen, 2005 The papers in this volume focus on notions which are central to the work of John M Anderson the founder of Dependency Phonology and to phonological theory the idea of structural analogy between phonology and syntax the head dependent relation the idea that phonological representations are best conceived of in terms of a set of privative elements rather than as binary valued features and the related notions of contrastivity and specification and non specification An important issue dealt with is the relationship between specification and derivationality and the question whether derivations are necessary in phonological theory Many of the contributions provide sound empirical support for the appeal to elements and to headhood at all levels of phonological analysis The book will be of interest to anyone interested in current issues in phonological theory
