**Frog Day** Martha L. Crump, 2024-10-15 An illustrated hourly guide that follows twenty-four frogs as they eat find mates care for their young and survive our harsh and changing planet In this short book celebrated biologist Marty Crump leads readers on a worldwide field trip in search of frogs Each chapter of *Frog Day* covers a single frog during a single hour highlighting how twenty-four different species spend their time Our day begins at midnight in Indonesia with the rustle of leaves above It's not

a bird but Wallace's flying frog using its webbed feet and emerald green skin flaps to glide through the forest canopy In the early hours of the morning we hear a horned marsupial frog bopping and a wood frog quacking to attract mates At six o'clock in the morning beneath a streetlight in Honolulu we meet a corpulent invasive cane toad slurping insects and sometimes snakes lizards turtles birds and mice At noon we watch parenting in action as an African bullfrog bulldozes a path through the mud to free his tadpoles from a drying pond At dusk in a Peruvian rain forest we observe the ultimate odd couple a hairy tarantula and what looks like a tiny amphibian pet taking shelter in the spider's burrow Other frogs make a tasty meal for this tarantula but the dotted humming frog is a friend eating the ants that might otherwise make a meal of the tarantula's eggs For each hour in our Frog Day award winning artist Tony Angell has depicted these scenes with his signature pen and ink illustrations Working closely together to narrate and illustrate these unique moments in time Crump and Angell have created an engaging read that is a perfect way to spend an hour or two and a true gift for readers amateur scientists and all frog fans
