Ghost, Android, Animal Tony M. Vinci, 2019-11-19 *Ghost, Android, Animal* challenges the notion that trauma literature functions as a healing agent for victims of severe pain and loss by bringing trauma studies into the orbit of posthumanist thought. Investigating how literary representations of ghosts, androids and animals engage traumatic experience, this book revisits canonical texts by William Faulkner and Toni Morrison and aligns them with experimental and popular texts by Shirley Jackson, Philip K. Dick and Clive Barker. In establishing this textual field, the book reveals how depictions of non-human agents invite readers to cross subjective and cultural thresholds and interact with the impossible pain of others. Ultimately, this study asks us to consider new practices for reading trauma literature that enlarges our conceptions of the human and the real.

conceitos biológicos complexos são transformados por Ed Yong em uma prosa de leitura agradável e acessível nos guiando pela exploração dos mais variados e curiosos sentidos e seus correspondentes. Entre tantas outras descobertas, entendemos que esses sentidos existem em nível bem superior aos proverbiais cinco sobre os quais se costuma afirmar de maneira limitada que bastam para perceber tudo o que há no planeta. Neste livro, Yong desafia perspectivas antropocêntricas e nos apresenta a um universo cativante onde cada espécie está envolta em sua própria percepção sensorial. O autor também aborda com habilidade o tema controverso dos experimentos com animais para desmistificar ideias pseudocientíficas e incentivar cada vez mais a necessária humildade nas tentativas humanas de compreender a dor e a delícia que para outros seres além de nós sentir e viver esse mundo imenso. Ao divergir da abordagem típica dos sentidos dos animais, o autor nos instiga a enxergar como criaturas não humanas por si mesmas e de muitas e fascinantes maneiras experimentam o mundo.

Dante's Education Filippo Gianferrari, 2024-06-25 In fourteenth century Italy, literacy became accessible to a significantly larger portion of the lay population, allegedly between 60 and 80 percent in Florence, and provided a crucial means for the vernacularization and secularization of learning and for the democratization of citizenship. Dante Alighieri's education and oeuvre sit squarely at the heart of this historical and cultural transition and provide an ideal case study for investigating the impact of Latin education on the consolidation of autonomous vernacular literature in the Middle Ages, a fascinating and still largely unexamined phenomenon. On the basis of manuscript and archival evidence, Gianferrari reconstructs the contents, practice, and readings of Latin instruction in the urban schools of fourteenth-century Florence. It also shows Dante's continuous engagement with this culture of teaching in his poetics, thus revealing his contribution to the expansion of vernacular literacy and education. The book argues that to achieve his unprecedented position of authority as a vernacular intellectual, Dante conceived his poetic works as an alternative educational program for laypeople who could read and write in the vernacular but had little or no proficiency in Latin. By reconstructing the culture of literacy shared by Dante and his lay readers, *Dante's Education* shifts critical attention from his legacy as Italy's national poet and a great books author in the Western canon to his experience as a marginal intellectual engaged in advancing a marginal culture. [Animal Languages in the Middle Ages](#) Alison Langdon, 2018-02-13 The essays in this interdisciplinary volume explore language broadly construed as part of the continued interrogation of the boundaries of human and nonhuman animals in the Middle Ages. Uniting a diverse set of emerging and established scholars, *Animal Languages* questions the assumed medieval distinction between humans and other animals. The chapters point to the wealth of non-human communicative and discursive forms through which animals function both as vehicles for human meaning and as agents of their own, demonstrating the significance of human and non-human interaction in medieval texts, particularly for engaging with the Other. The book ultimately considers the ramifications of deconstructing the medieval anthropocentric view of language for the broader question of human singularity. **The Works of Aristotle: Meteorologica, E.W.
