The Political Culture of Nordic Self-Understanding Ainur Elmgren, Norbert Götz, 2017-10-02 Power investigation or the practice of power to legitimize itself through commissioned programmes of scientific enquiry is a hallmark of Nordic democracy Five power investigations have been conducted in the Nordic countries since 1972 The close connection to state power has not dissuaded prominent scholars from participating in them nor have their findings evoked strong criticism Combining politically guided perspectives with collaborative research power investigations represent public events that typify the ostensibly open political culture of the Nordic countries rather than simply existing as texts or as a politico scientific genre Although such investigations have been thought of as critical studies of power the authors in this book show that their findings have varied greatly and that they have served as tools for wielding power Whatever shortcomings they uncover the utility of these investigations in suggesting transparency and self reflection enhances the legitimacy of Scandinavian government The investigations are persuasive exercises through which the commissioning authorities and those scholars hired to carry them out engage in a mutually beneficial exchange Underlying this strategy is the perception deeply embedded in Nordic political culture that politics is a progressive rational endeavour and that identification with the state is an honourable role for academics This book was

published as a special issue of the Journal of Contemporary European Studies     1974 Annual Supplement Joan Schmitz Bergholt, 2013-12-21     *From Poor Law to Welfare State* Walter I. Trattner, 1984 Walter I Trattner is Professor of History at the University of Wisconsin Milwaukee     Self, War, and Society Mary Jo Deegan, 2017-09-08 George Herbert Mead 1863-1931 is a founding figure in the field of sociology His stature is comparable to that of his contemporaries Emile Durkheim and Max Weber Mead's contribution was a profound and unique American theory that analyzed society and the individual as social objects As Mead saw it both society and the individual emerged from cooperative democratic processes linking the self the other and the community Mary Jo Deegan a leading scholar of Mead's work traces the evolution of his thought its continuity and change She is particularly interested in the most controversial period of Mead's work in which he addressed topics of violence and the nation state Mead's theory of war peace and society emerged out of the historical events of his time particularly World War I During this period he went from being a pacifist along with his contemporaries John Dewey and Jane Addams to being a strong advocate for war From 1917-1918 Mead became a leader in voicing the need for war based on his theory of self and society After the war he became disillusioned with President Woodrow Wilson with Americans failure to support mechanisms for international arbitration and with the political reasons for American participation in World War I He returned to a more pacifist and co-operative model of behavior during the 1920s when he became less political more abstract and more withdrawn from public debate The book includes Deegan's interpretation of Mead's early social thought his friendship and family networks the historical context of America at war and the importance of analysis of violence and the state from Mead's perspective She also provides illustrative selections from Mead's work much of which was previously unpublished     **Social Ontology of Whoness** Michael Eldred, 2018-10-26 How are core social phenomena to be understood as modes of being This book offers an alternative approach to social ontology Recent interest in social ontology on the part of mainstream philosophy and the social sciences presupposes from the outset that the human being can be cast as a conscious subject whose intentionality can be collective By contrast the present study insistently poses the crucial question of who the human being is and how they sociate as whos Such whoness is a clean cut departure from the venerable tradition of questioning whatness quidditas essence in philosophical thinking Casting human being hermeneutically as whoness opens up new insights into how human beings sociate in interplays of mutual estimation that are simultaneously social power plays Hitherto the ontology of social power in all its various guises has only ever been implicit This book makes it explicit The kind of social power prevalent in capitalist societies is that of the reified value embodied in commodities money capital co Reified value itself is constituted through an interplay of mutual estimation among things that reflects back on the power interplay among whos In this way a new critique of capitalism becomes possible     A Propensity to Self-subversion Albert O. Hirschman, 1995 In the substantial essays that open this collection Hirschman reappraises points he made in such books as *Exit Voice and Loyalty* *The Strategy of Economic Development* and *The Rhetoric of Reaction* Subsequent essays fruitfully

reexplore the themes of Latin American development and market society that have occupied him throughout his career Hirschman also forays into new puzzles such as the likely impact negative or otherwise of the Eastern European revolutions of 1989 on the Third World the on and off connections between political and economic progress and the role of conflict in enhancing community spirit in a liberal democracy

*Challenges of Social Cohesion in Times of Crisis* M. Zupi, E. Estruch Puertas, 2010

*The Entrepreneurial Society* Jean Bonnet, Domingo García Pérez De Lema, Howard E. Van Auken, 2010-01-01 This timely book analyses the emergence of new firms in a broad context where economics management and sociological approaches may be joined for a new perspective The Entrepreneurial Society reveals that the market benefits of an entrepreneurial economy are evident in the new technology that has been made available to consumers over the past ten to 20 years It illustrates that entrepreneurial firms provide the market with innovations that create new products and in turn generate new employment and tax revenue thus playing a critical role in surviving the economic crisis The expert contributors explore the diverse

conditions that explain permit and support entrepreneurship allowing thinking outside the box and enhancing breakthrough innovations At a time when new challenges relating to the ecological footprint are appearing this work will prove crucial The eclectic approaches to entrepreneurship within this book gathered from different countries and fields of research will prove to be hotly sought after by researchers and postgraduate students of entrepreneurship and social policy      **Making Global Self-Regulation Effective in Developing Countries** Dana L.
