From Conquest To Struggle Jesus Of Nazareth In Latin America:

From Conquest to Struggle David B. Batstone, 1991-01-01 This book goes to the very heart of the passionate debate over the true character of Christian faith and practice The advance of liberation theology in the Latin American church has caused international reverberations within both the religious and political worlds The Vatican was moved to denounce it as heretical and the Reagan Bush administration has deemed it a significant threat to the stability of the region Here Batstone evaluates the writings of liberation theologians as they consider the central figure of Christian faith Jesus of Nazareth and asks whether a message of liberation for the poor and oppressed actually springs from the life and teachings of Jesus or is merely a religious projection of activists bent on radical social transformation The judgment given to that issue will weigh heavily in the debate which currently rages in religious communities and seminaries over the political role and responsibility of the church Batstone s work links these discussions to the concrete lives of the Latin American people and in that sense goes beneath the text and examines the subtext of religious reflection Chapters present events and stories that originate in the daily realities of contemporary Latin America and then consider what connection these experiences have to the story of Jesus of Nazareth

From conquest to struggle David B. Batstone, 1989 *The Cross of Christ in African American Christian Religious Experience* Demetrius K. Williams, 2023-10-03 In *The Cross of Christ in African American Christian Religious Experience* Piety Politics and Protest Demetrius K Williams examines and explores the ideational importance and rhetorical function of cross language and terminology in Black religious experience through an ideological lens Williams argues that for the first time in Christian history the European nation of Portugal under the guidance of Prince Henry used the theology of the cross to justify and sustain an exclusive trade of Sub Saharan African peoples Claiming that Jesus died on the cross only to save lost souls provided a convincing rational for Henry s exploratory

voyages of discovery to West African to exclusively enslave Black bodies With the confirmation of Catholic Popes and the competition of other European nations this same rationale would inspire empire building colonization and slave trading justified on their newly constructed ideological narrative of compassionate evangelism to save lost souls Over time with massive conversions to the faith of their enslavers Black people s Christian religious experiences would articulate a response to the world that held them in thrall That response would be articulated most consistently and effectively through their understanding of the cross of Christ Williams affirms Howard Thurman s claim that by some amazing but vastly creative spiritual insight the slave undertook the redemption of a religion that the master had profaned in his midst **The**

James Anaya,2004 In this thoroughly revised and updated edition of the first book length treatment of the subject S James Anaya incorporates references to all the latest treaties and recent developments in the international law of indigenous peoples Anaya demonstrates that while historical trends in international law largely facilitated colonization of indigenous peoples and their lands modern international law s human rights program has been modestly responsive to indigenous peoples aspirations to survive as distinct communities in control of their own destinies This book provides a theoretically grounded and practically oriented synthesis of the historical contemporary and emerging international law related to indigenous peoples It will be of great interest to scholars and lawyers in international law and human rights as well as to those interested in the dynamics of indigenous and ethnic identity **Resurrection and Discipleship** Thorwald

International Law as Social Construct Carlo Focarelli,2012-05-24 The book distils and articulates international law as a

social construct It does so by analysing its social foundations essence and roots in practical and socially workable as opposed to pure reason In addition to well known doctrines of jurisprudence and international law it draws upon psycho analytic insights into the origins and nature of law as well as philosophical social constructivism The work suggests that seeing law as a social construct is crucial to our understanding of international law and to the struggle to create better working rules The book re conceptualizes both past and new doctrines of international law as constructs namely as strategies of concomitantly de mythologizing and re mythologizing international law Key areas of international law including subjects sources hierarchy values and remedies are shown to be part of this process The social impact on international law of transnational actors and stakeholders normative fragmentation global justice legitimacy of both rules and players dynamics and hierarchization of norms compliance and implementation in municipal law is also extensively investigated Five basic values of the international community namely security humanity wealth environment and knowledge are explored by stressing their inter and intra tensions Finally the analysis is extended to the role that international courts play in the prosecution of heads of state and other transnational players who violate international law

On Cultural Rights: The Equality of Nations and the Minority Legal Tradition William Kurt Barth, 2008-08-31 This work addresses the question how has the evolution of a legal regime within the United Nations and regional organisations influenced state behaviour regarding recognition of minority groups The author assesses the implications of this regime for political theorists account of multiculturalism This research bridges a gap between normative questions in political theory on multiculturalism and the international law on minorities It does so by means of case studies of legal challenges involving two groups namely the Aboriginal peoples of Canada and the Roma peoples in Europe The author concludes by discussing the normative implications of the minority regime for helping to resolve conflicts that arise out of state treatment of minority groups
