From Deserts The Prophets Come The Creative Spirit In Australia 1788 197:

Australia, the Recreational Society David Mosler, 2002-01-30 From its very inception Australia has been a derivative society First as part of the British Empire and then soon after World War II what Mosler considers the American Empire and the new end of century Americanized global culture This has meant that Australia has struggled to attain its own identity Mosler explores that struggle for national independence a struggle that seems to be doomed to failure According to Mosler the reasons for this failure lie in Australia's propensity to remain a recreational culture a culture more attuned to pleasure and dependence than regimented hard work and the concomitant collective pattern of national assertiveness The Australian economy defense arrangements culture and psychology have been dominated by other nations and transnational forces The prospects for the nation in the future appear to be somewhat grim unless this historical pattern of dependence and lack of respect indeed almost contempt for national institutions is reversed A provocative analysis that will be of interest to scholars students researchers and anyone interested in Australian history and contemporary life and culture

Burning Bush Stephen J. Pyne, 2014-10-07 From the time of the continent's formation tens of millions of years ago as the Godwana twin of Antarctica Australia has been dominated by fire much as its sister has been by ice Now Stephen Pyne one of our foremost environmental historians proposes a major reinterpretation of the Australian experience by using fire and Australia to explain one another He narrates the story of how fire came to Australia and interacted with the Australian biota and its human inhabitants while at the same time he relates the planetary saga of fire as it has been played out on this special island continent Much as the Aborigines exploited fire to remake their environment into something more usable so Stephen Pyne exploits fire to transform the landscape of history into something more accessible to use its transmuting power to extract new meaning out of familiar events Pyne traces the impact of fire from its initial influence on the evolving vegetation of the new continent through its use by the Aborigines and the subsequent European settlers to the holocaust of February 1983 known as Ash Wednesday and he shows us that the dynamic nature of fire has made it a most powerful environmental determinant in Australia shaping both its social and natural histories In his critically acclaimed study of Antarctica The Ice Pyne explored the myriad dimensions of the cold continent now Burning Bush offers us an equally absorbing examination of a continent informed by fire
