## **From Eros To Gaia:**

FROM EROS TO GAIA Freeman Dyson, 2013-07-10 Readers of Freeman Dyson's previous books *Disturbing the Universe*, *Weapons and Hope* and *Infinite in All Directions* have discovered for themselves what Dyson reveals here that he was a writer long before he became a distinguished scientist. The aim of this new book as Dyson says is to open windows to let the experts inside the temple of science see out and to let the ordinary citizens outside see in. In this process an immensely broad range of ideas, people, contemporary history and discoveries of many sorts pass in review. Beginning with a piece of writing he did as a child and ending with recent work he goes from Eros the god of youthful passion to Gaia the fertile life-giving mother planet Earth. The pilgrimage is a good metaphor for the life of a writer. This book is full of discoveries. In the company of one of the most lucid minds of our time one approaches great men and problems central to our common existence. Always there is warmth, kindness, high intelligence and humor. Dyson is intimate with both science and man. Whether he is dealing with the problems of physics or politics, whether he is engrossed in astronomy or literature, whether he is concentrating on an African village or the science of space, Dyson's view is always infinite in all directions, always following the path of diversity, always keeping his eye on the wonder of our earth and the health and happiness of its inhabitants. **Bulletin of the Atomic Scientists**

, 1993-06 The *Bulletin of the Atomic Scientists* is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the *Bulletin's* iconic Doomsday Clock stimulates solutions for a safer world. **The Faith of Scientists** Nancy K. Frankenberry, 2008-08-11 *The Faith of Scientists* is an anthology of writings by twenty-one legendary scientists from the dawn of the Scientific Revolution to the frontiers of science today about their faith, their views about God and the place religion holds or doesn't in their lives in light of their commitment to science. This is the first book to bring together so many world-renowned figures of Western science and present them in their own words, offering an intimate window into their private and public reflections on science and faith. Leading religion scholar Nancy Frankenberry draws from diaries, personal letters, speeches, essays and interviews and reveals that the faith of scientists can take many different forms, whether religious or secular, supernatural or naturalistic, conventional or unorthodox. These eloquent writings reflect a spectrum of views from diverse areas of scientific inquiry. Represented here are some of the most influential and colossal personalities in the history of science, from the founders of science such as Galileo, Johannes Kepler, Francis Bacon, Isaac Newton, Charles Darwin and Albert Einstein to modern-day scientists like Carl Sagan, Stephen Jay Gould, Jane Goodall, Freeman Dyson, Stephen Hawking, Edward O. Wilson and Ursula Goodenough. Frankenberry provides a general introduction as well as concise introductions to each chapter that place these writings in context and suggest further reading from the latest scholarship. As surprising as it is illuminating and inspiring, *The Faith of Scientists* is indispensable for students, scholars and anyone seeking to immerse themselves in important questions about God, the universe and science.

**Works of Francis Bacon** Francis Bacon, 1862 *The Poems of Hesiod* Hesiod, 1983 Hesiod is the first Greek and therefore the first European we can know as a real person for unlike Homer he tells us about himself in his poems Hesiod seems to have been a successful farmer and a rather gloomy though not humorless man One suspects from his concern for the bachelor's lot and some rather unflattering remarks about women that he was never married A close study of both poems reveals the same personality that of a deeply religious man concerned with the problems of justice and fate *Freedom* Evaggelos Vallianatos, 2025-02-01 In this book Vallianatos paints a picture of freedom in Greek history and civilization Freedom for the Greeks he says has been like breathing air He documents how freedom gave birth to the great achievements of Greek civilization The Greeks repeatedly defeated large invading Persian armies in early fifth century BCE Those heroic victories secured Greek and Western civilization Modern Greeks also won over large Turkish forces in the 1820s thus establishing the independence of Greece In 1940 the Greeks defeated a large Italian army winning the first victory of WWII The result of the triumph of freedom especially in ancient Greece Vallianatos says was an explosion of light Civilization bloomed with the craftsmanship of the Bronze Age 3 100 BCE the poetry of Homer the Olympics democracy Aristotle and his invention of science technology theater the Parthenon gorgeous art and architecture and the cosmic Greek influence of Alexander the Great and the Antikythera computer of genius in the second century BCE These Greek achievements
