From Crisis to Growth in Africa Mats Lundahl, 2001-08-23

From Crisis to Renewal Kempe Ronald Hope, 2021-10-11

This volume deals with crisis and renewal in African development policy and management. It digs deep into the stock of and thoroughly analyzes the nature, impact and future of development policy and management on the continent. It demonstrates the failure of post-independence policy and management in most of Africa, traces the emergence and results of reform measures and advocates the lessons of success for the rest of Africa derived from Botswana's approach to sustainable development and its achievement of economic prosperity and the maintenance of political stability and good governance. It concludes rather optimistically that the prospects for sustainable development are much better now than they have ever been before, with the 21st century likely to be hailed as The African Century, bringing with it a durable peace and sustainable growth.

From Adjustment To Development In Africa

Gerald K. Helleiner, 1994-09-22. A distinguished collection of international and African authors, including economists from the IMF and the World Bank as well as their critics, addresses the key policy issues in agriculture, trade, macroeconomic management, social issues, privatization, external capital flow and political economy. An introductory interpretive essay searches for areas of consensus and identifies those of continuing controversy.

Economic Growth and Development in Africa Horman Chitonge, 2015-01-09. In recent years, Africa has undergone the longest period of sustained economic growth in the continent's history, drawing the attention of the international media and academics alike. This book analyses the Africa Rising narrative from multidisciplinary perspectives, offering a critical assessment of the explanations given for the poor economic growth and development performance in Africa prior to the millennium and the dramatic shift towards the new Africa. Bringing in perspectives from African intellectuals and scholars, many of whom have previously been overlooked in this debate, the book examines the construction of Africa's economic growth and development portraits over the years. It looks at two institutions that play a vital role in African development, providing a detailed explanation of how the World Bank and the IMF have interpreted and dealt with the African challenges and experiences. The insightful analysis reveals that if Africa is rising, only 20-30 per cent of Africans are aboard the rising ship, and the main challenge facing the continent today is to bring on board the majority of Africans who have been excluded from growth. This book makes the complex and sometimes confusing debates on Africa's economic growth experience more accessible to a wide range of readers interested in the Africa story. It is essential reading for students and researchers in African Studies and will be of great interest to scholars in Development Studies, Political Economy and Development Economics.
