Brink, Diedrich Bruns, Hilde Tobi, Simon Bell, 2016-11-10 This book looks at research methods that are specific to and for landscape architecture and contributes to the further development of landscape architecture as an academic discipline in its own right A Research Agenda for Landscape Studies of Planning Mattias Qviström, 2025-05-14 This is an open access title

available under the terms of a CC BY NC ND 4.0 License It is free to read download and share on Elgaronline thanks to generous funding support from the Swedish research council Formas This timely Research Agenda explores the complex and contested role that landscape plays in planning It promotes theoretically driven pluralistic research to enrich understanding of the landscape planning interplay examining how the broader discipline of landscape studies can complement and critique the dominant field of landscape science Current Trends in Landscape Research Lothar Mueller, Frank

Eulenstein, 2019-11-13 This book presents definitions key concepts and projects in landscape research and related areas such as landscape science and landscape ecology addressing and characterising the international role status challenges future and tools of landscape research in the globalised world of the 21st century The book brings together views on landscapes from leading international teams and emerging authors from different scientific disciplines and regions of the globe It describes approaches for achieving sustainability and for handling the multifunctionality of landscapes and includes international case studies demonstrating the great potential of landscape research to provide partial sustainable solutions while developing cultural landscapes and protecting semi natural landscapes It is intended for scientists from various disciplines as well as informed readers dealing with landscape policies planning involvement management stewardship and conservation **The**

**Routledge Handbook of Landscape Ecology** Robert A. Francis, James D.A. Millington, George L.W. Perry, Emily S. Minor, 2021-09-08 The Handbook provides a supporting guide to key aspects and applications of landscape ecology to underpin its research and teaching A wide range of contributions written by expert researchers in the field summarize the

latest knowledge on landscape ecology theory and concepts landscape processes methods and tools and emerging frontiers Landscape ecology is an interdisciplinary and holistic discipline and this is reflected in the chapters contained in this Handbook Authors from varying disciplinary backgrounds tackle key concepts such as landscape structure and function scale and connectivity landscape processes such as disturbance flows and fragmentation methods such as remote sensing and mapping fieldwork pattern analysis modelling and participation and engagement in landscape planning and emerging frontiers such as ecosystem services landscape approaches to biodiversity conservation and climate change Each chapter provides a blend of the latest scientific understanding of its focal topics along with considerations and examples of their application from around the world An invaluable guide to the concepts methods and applications of landscape ecology this book will be an important reference text for a wide range of students and academics in ecology geography biology and interdisciplinary environmental studies

*Measuring Landscapes* Andre Botequilha Leitaó, Joseph Miller, Jack Ahern, Kevin McGarigal, 2012-09-26 This practical handbook bridges the gap between those scientists who study landscapes and the planners and conservationists who must then decide how best to preserve and build environmentally sound habitats Until now only a small portion of the relevant science has influenced the decision making arenas where the future of our landscapes is debated and decided The authors explain specific tools and concepts to measure a landscape's structure form and change over time Metrics studied include patch richness class area proportion patch number and density mean patch size shape radius of gyration contagion edge contrast nearest neighbor distance and proximity These measures will help planners and conservationists make better land use decisions for the future

**Routledge Handbook of Urban Landscape Research** Kate Bishop, Linda Corkery, 2022-12-27 Landscape architecture is one of the key professions dedicated to making cities hospitable and healthy places to live work and play while respecting and enhancing the natural environments and landscapes we inhabit This edited collection presents current writing about the pivotal roles that landscape architects play in addressing some of the most pressing problems facing the planet its environments and its populations through their research analysis and speculative practice The book has assembled current writings on recent research structured around five major themes governance power and partnership infrastructure systems and performance environment resilience and climate change people place and design and culture heritage and identity As a collection the chapters demonstrate the diversity of themes and topics that are expanding the scholarly body of knowledge for the discipline and its relevance to the practice of landscape architecture The contributors to this book are academic researchers and practitioners from the discipline of landscape architecture The chapters draw on their research teaching and experience as well as analysis of project examples Fifty two contributors from the United States United Kingdom Sweden Denmark the Netherlands Nigeria Malaysia Spain Colombia Australia New Zealand and Canada discuss a diverse range of contemporary themes in urban landscape architecture Collectively the contributors demonstrate the breadth of experience shared concerns

and distinct issues that challenge urban landscape architecture and cities in the 21st century     Nanjing: Historical Landscape and Its Planning from Geographical Perspective Yifeng Yao, 2016-07-15 This book studies the historical changes of the cityscape of Nanjing from the point of view of geographical systems Nanjing is a city located along the Yangtze River originated 2500 years ago after which ten dynasties established their capital dependent on the geographical conditions The book focuses on the analysis of the characteristics of mountain and river systems in the various historical periods and provides investigations of historical sites along with these systems This enables the search for the laws of historical evolution and spatial structure changes which is also the research of the relationship between man and nature It extends the traditional preservation and cityscapes planning to that of geographical landscape system Readers working in the area of geography history urban and landscape planning will benefit from it     *Key Topics in Landscape Ecology* Jianguo Wu, Richard J. Hobbs, 2007-03-29 Landscape ecology is a relatively new area of study which aims to understand the pattern of interaction of biological and cultural communities within a landscape This book brings together leading figures from the field to provide an up to date survey of recent advances identify key research problems and suggest a future direction for development and expansion of knowledge Providing in depth reviews of the principles and methods for understanding landscape patterns and changes the book illustrates concepts with examples of innovative applications from different parts of the world Forming a current state of the science for the science of landscape ecology this book forms an essential reference for graduate students academics professionals and practitioners in ecology environmental science natural resource management and landscape planning and design     **Visualization in Landscape and Environmental Planning** Ian Bishop, Eckart Lange, 2005-05-10 An overview of issues involved in visualization technologies used in landscape and environmental planning Covers a classification of the technology as well as a number of specialized applications across agricultural industrial and urban planning     Landscape Planning with Ecosystem Services Christina von Haaren, Andrew A. Lovett, Christian Albert, 2019-06-25 Human well being depends in many ways on maintaining the stock of natural resources which deliver the services from which human s benefit However these resources and flows of services are increasingly threatened by unsustainable and competing land uses Particular threats exist to those public goods whose values are not well represented in markets or whose deterioration will only affect future generations As market forces alone are not sufficient effective means for local and regional planning are needed in order to safeguard scarce natural resources coordinate land uses and create sustainable landscape structures This book argues that a solution to such challenges in Europe can be found by merging the landscape planning tradition with ecosystem services concepts Landscape planning has strengths in recognition of public benefits and implementation mechanisms while the ecosystem services approach makes the connection between the status of natural assets and human well being more explicit It can also provide an economic perspective focused on individual preferences and benefits which helps validate the acceptability of environmental planning goals Thus linking

landscape planning and ecosystem services provides a two way benefit creating a usable science to meet the needs of local and regional decision making The book is structured around the Driving forces Pressures States Impacts Responses framework providing an introduction to relevant concepts methodologies and techniques It presents a new ecosystem services informed approach to landscape planning that constitutes both a framework and toolbox for students and practitioners to address the environmental and landscape challenges of 21st century Europe

Smardon,2021-06-03 This book contains five research articles and one review article derived from the 6th Fabos Conference on Greenway Planning held at the University of Massachusetts Amherst in April of 2019 Specific topics covered include greenway planning and analysis for urban morphology typology climate change impact and recreational and health usage in addition to historic greenway restoration All the articles illustrate multidisciplinary approaches for analyzing urban greenway functions within expanding and contracting cities

**New Lives, New Landscapes Revisited** Linda M. Ross,Katrina Navickas,Ben Anderson,Matthew Kelly,2023-06-08 How did rural Britain become modern during the twentieth century New Lives New Landscapes examines how the development of modern infrastructure in Britain transformed both its landscapes and the lives of those who lived within them Shifting the focus away from the city the narrative challenges us to rethink what we mean by modern Britain Nature, Place & People: Forging Connections Through Neighbourhood Landscape Design Puay-yok Tan,Kuei-hsien Liao,Yun Hye Hwang,Vincent Chua,2018-04-23 Neighbourhood landscapes are

the quintessential forms of urban landscapes in most cities worldwide They are pervasive and hence experienced by the large majority of urban dwellers in their everyday life More than parks nature reserves or nature areas which are visited as destinations neighbourhood landscapes provide the most immediate frequent and convenient form of nature experienced by urban dwellers on a daily basis They are also valuable as social spaces to bring residents together foster social ties and strengthen communities Despite their importance surprisingly little has been written to guide the planning and design of neighbourhood landscapes This book is written for a specific purpose to illustrate how the design of neighbourhood landscapes helps to deliver more benefits for urban dwellers and at the same time protect ecosystems that facilitate human well being This is in turn important as the synergistic relationships between human well being quality of biophysical urban environment and health of human environment interactions fundamentally underpin urban sustainability The authors emphasize the role neighbourhood landscapes play in forging connections between people and nature people and people and people and place Most of all the book highlights the role of focusing on people in this endeavour as it is only when landscapes are appropriately designed and when people recognize these benefits that they become valued and protected as a community resource This book is organized into two parts Part 1 focuses on the conceptual foundations that underpin the neighbourhood landscape design guidelines being developed In this section the authors describe the key concepts relating functions of neighbourhood landscapes to the key urban development goals of sustainability liveability and reliance how they can be represented in a framework and how a synthesis of current knowledge of cities as socio ecological systems helps to identify principles that can guide the designing of neighbourhood landscapes Part 2 is more application focused and is centred on neighbourhood landscape design guidelines inspired by the concept of ecosystem services The guidelines consist of design approaches practical strategies design targets and performance monitoring indicators for tracking the performance of neighbourhood landscapes The book is written for readers in academia and design practice and anyone who has a role in shaping neighbourhood landscapes for the benefit of urban dwellers

*The Cultural Landscape & Heritage Paradox* Tom Bloemers, Henk Kars, Arnold Van der Valk, 2010 The basic problem is to what extent we can know past and mainly invisible landscapes and how we can use this still hidden knowledge for actual sustainable management of landscape s cultural and historical values It has also been acknowledged that heritage management is increasingly about the management of future change rather than simply protection This presents us with a paradox to preserve our historic environment we have to collaborate with those who wish to transform it and in order to apply our expert knowledge we have to make it suitable for policy and society The answer presented by the Protection and Development of the Dutch Archaeological Historical Landscape programme pdl bbo is an integrative landscape approach which applies inter and transdisciplinarity establishing links between archaeological historical heritage and planning and between research and policy
