The Friend, 1842 *Friendship Leadership* Matt Messner, Rachel McMurray-Branscombe, 2018-11-29. No one can deny that friendships are powerful relationships of influence. Why not strategically incorporate friendship within a philosophy of leadership? People long for relational models of leadership, yet few specific methodologies have been developed. This book examines the friendship of God with humanity and the leadership of Jesus with his disciples, to whom he declared, "I no longer call you servants. Instead, I have called you friends." John 15:15. In response to this enduring example of the Divine bringing together both friendship and leadership, this book presents an unexplored model of leadership for the Christian practitioner. *Friendship Leadership*. The authors of *Friendship Leadership* share research, historical examples, and their personal experiences with this leadership model as they describe both the trials and triumphs. Through this process, the book addresses the primary barriers a leader might experience when utilizing the *Friendship Leadership* model. Finally, the authors offer a guide for how to incorporate friendship into their leadership, strengthening others as they follow the example of our great Leader. The result is a transformational way of leading that nurtures relationships.

Narrating Friendship and the British Novel, 1760-1830 Katrin Berndt, 2016-10-14 Friendship has always been a universal category

of human relationships and an influential motif in literature but it is rarely discussed as a theme in its own right In her study of how friendship gives direction and shape to new ideas and novel strategies of plot character formation and style in the British novel from the 1760s to the 1830s Katrin Berndt argues that friendship functions as a literary expression of philosophical values in a genre that explores the psychology and the interactions of the individual in modern society In the literary historical period in which the novel became established as a modern genre friend characters were omnipresent reflecting enlightenment philosophy s definition of friendship as a bond that civilized public and private interactions and was considered essential for the attainment of happiness Berndt s analyses of genre defining novels by Frances Brooke Mary Shelley Sarah Scott Helen Maria Williams Charlotte Lennox Walter Scott Jane Austen and Maria Edgeworth show that the significance of friendship and the increasing variety of novelistic forms and topics represent an overlooked dynamic in the novel s literary history Contributing to our understanding of the complex interplay of philosophical socio cultural and literary discourses that shaped British fiction in the later Hanoverian decades Berndt s book demonstrates that novels have conceived the modern individual not in opposition to but in interaction with society continuing Enlightenment debates about how to share the lives and the experiences of others
