Parish Communities and Religious Conflict in the Vale of Gloucester, 1590-1690 Daniel C. Beaver,1998-11-25 Many historians have attempted to understand the violent religious conflicts of the seventeenth century from viewpoints dominated by concepts of class gender and demography But few studies have explored the cultural process whereby religious symbolism created social cohesion and political allegiance This book examines religious conflict in the parish communities of early modern England using an interdisciplinary approach that includes all these perspectives Daniel Beaver studies the urban parish of Tewkesbury and six rural parishes in its hinterland over a period of one hundred years drawing on local ecclesiastical court records sermons parish records corporate minutes and charity books and probate documents He discusses the centrality of religious symbols and ceremonies in the ordering of local societies particularly in local conceptions of place personal identity and the life cycle Four phases in the transformation of parish communities emerge and are examined in this book This exploration of the interrelationship of religion politics and society and the transformation of local communities in civil war has a value beyond the particular history of early modern England contributing to a broader understanding of religious revivals fundamentalisms and the persistent link between religion nationalism and ethnic identity in the modern world *Population Change in Southeast Asia* Wilfredo F.
