From Alienation To Surplus Value:

From Alienation to Surplus Value Paul Walton, Andrew Gamble, 1972 *From Alienation to Surplus Value* Paul Walton, 1976 **From Alienation to Surplus Value** Paul Walton, Andrew Gamble, 1976 **Marxism and Alienation** Nicholas Churchich, 1990 An exposition and critique of the views of Marx and Marxists in which Marx's views are compared with other views and are explored in terms of theories causes and the transcendence of alienation self alienation and self realization and economic religious philosophic scientific social and political alienation [Responses to Marx's Capital](#), 2017-11-01 Responses to Marx's Capital From Rudolf Hilferding to Isaak Illich Rubin is a collection of primary sources dealing with the reception of the economic works of Karl Marx from the First to the Third International The documents translated for the first time from German and Russian range from the original reviews of the three volumes of Capital and the three volumes of Theories of Surplus Value to the debates between the Marxist economists and the bourgeois academic representatives of the theory of marginal utility and the German historical school The volume closes with six essays by the prominent economist Isaak I Rubin including Essays on Marx's Theory of Money and The Dialectical Development of Categories in Marx's Economic System **Sociological Paradigms and Organisational Analysis** Gibson Burrell, Gareth Morgan, 2017-03-02 The authors argue in this book that social theory can usefully be conceived in terms of four broad paradigms based upon different sets of meta theoretical assumptions with regard to the nature of social science and the nature of society The four paradigms Functionalist Interpretive Radical Humanist and Radical Structuralist derive from quite distinct intellectual traditions and present four mutually exclusive views of the social work Each stands in its own right and generates its own distinctive approach to the analysis of social life The authors provide extensive reviews of the four paradigms tracing the evolution and inter relationships between the various sociological schools of thought within each They then proceed to relate theories of organisation to this wider background This book covers a great range of intellectual territory It makes a number of important contributions to our understanding of sociology and organisational analysis and will prove an invaluable guide to theorists researchers and students in a variety of social science disciplines It stands as a discourse in social theory drawing upon the general area of organisation studies industrial sociology organisation theory organisational psychology and industrial relations as a means of illustrating more general sociological themes In addition to reviewing and evaluating existing work it provides a framework for appraising future developments in the area of organisational analysis and suggests the form which some of these developments are likely to take **Time, Labor, and Social Domination** Moishe Postone, 1996 Moishe Postone undertakes a fundamental reinterpretation of Karl Marx's mature critical theory He calls into question many of the presuppositions of traditional Marxist analyses and offers new interpretations of Marx's central arguments He does so by developing concepts aimed at grasping the essential character and historical development of modern society and also at overcoming the familiar dichotomies of structure and action

meaning and material life These concepts lead him to an original analysis of the nature and problems of capitalism and provide the basis for a critique of actually existing socialism According to this new interpretation Marx identifies the core of the capitalist system with an impersonal form of social domination generated by labor and the industrial production process are characterized as expressions of domination generated by labor itself and not simply with market mechanisms and private property Proletarian labor and the industrial production process are characterized as expressions of domination rather than as means of human emancipation This reinterpretation entails the form of economic growth and the structure of social labor in modern society to the alienation and domination at the heart of capitalism This reformulation Postone argues provides the foundation for a critical social theory that is more adequate to late twentieth century capitalism The Norton Dictionary of Modern Thought Alan Bullock, Stephen Trombley, 1999 Nearly four thousand entries cover terms in all disciplines contributed by experts in each field with suggestions for further reading **Karl Marx on Socialist Theory and Practice** Wei

Xiaoping, 2022-10-09 This book discusses Marx's thinking on human emancipation based on his critique of capitalism and the prospect of socialism It analyzes the double relations between persons and things and persons and persons by tracking Marx's writings including MEGA2 and taking into consideration the socialist practice and socialist reform of the last century It is a necessary study for social scientists social and political philosophers and students for its deep and wide analysis from the perspective of Marxian theory in practice **Marx's Experiments and Microscopes** Paul B. Paolucci, 2019-12-02 In Marx's Experiments and Microscopes Modes of Production Religion and the Method of Successive Abstractions Paul B. Paolucci examines how Marx brought conventional scientific practice together with dialectical reason to produce his unique approach to sociological research Though scholars often interpret his work through either a dialectical framework or as an aspirant scientific contender less common are demonstrations of how Marx brought these two forms of inquiry together in ways as familiar to the conventional scientist as they are to the experienced Marxian scholar The book elaborates on how Marx used a method successive abstractions in his study of modes of production as well as how to apply that method to studies in political economy and the sociology of religion Karl Marx's Social and Political Thought Bob Jessop, Russell Wheatley, 1999

Weberian Sociological Theory Randall Collins, 1986-02-28 A new interpretation of Weberian sociology showing its relevance to current world issues **Zheng Chaolin, Selected Writings, 1942-1998**, 2022-12-05 Zheng Chaolin helped found the Chinese Communist Party's European branch in Paris in 1922 and its Trotskyist Opposition in Shanghai in 1931 He held the world record in political imprisonment seven years under Chiang Kai-shek as a revolutionary and 27 under Mao as a counterrevolutionary thus beating by a year Auguste Blanqui's previous record After joining the revolution in his teens his commitment never wavered Born in 1901 he died in 1998 so his life was coterminous with the century and a dramatic embodiment of its vicissitudes This book is record of his contribution to revolutionary thought in China , Essays in Social Value Theory: A Neoinstitutionalist Contribution Marc R. Tool, 2019-05-03 This is a collection of Marc Tool's essays on

institutional economics written over the 1980s

Rethinking Documentary: New Perspectives and Practices Thomas Austin, Wilma de Jong, 2008-05-16 From a boom in theatrical features to footage posted on websites such as YouTube and Google Video the early years of the 21st century have witnessed significant changes in the technological commercial aesthetic political and social dimensions of documentaries on film television and the web In response to these rapid developments this book rethinks the notion of documentary in terms of theory practice and object s of study Drawing together 26 original essays from scholars and practitioners it critically assesses ideas and constructions of documentary and where necessary proposes new tools and arguments with which to examine this complex and shifting terrain Covering a range of media output the book is divided into four sections Critical perspectives on documentary forms and concepts The changing faces of documentary production Contemporary documentary borders neighbours and disputed territories Digital and online documentaries opportunities and limitations Rethinking Documentary is valuable reading for scholars and students working in documentary theory and practice film studies and media studies

A Study of Marx's View of History Xianda Chen, 2025-09-30 This book summarizes the process of Marx s foundation of the view of history into two turning points namely from alienation to alienated labor and then from alienated labor to the materialistic view of history Meanwhile this book makes an in depth analysis of the ideas about the materialistic view of history in recent years which is conducive to further clarifying the ideas of Marxist learners and researchers Besides this book on the basis of the human exploration of historical laws analyzes how Marx broke through the limitations of previous historical views and went deep into history that is the process of discovering the laws of history itself thus profoundly revealing the important reference value of Marx s view of history in the transformation of human historical views It is also conducive to building a bridge of communication between Chinese and Western philosophy promoting international exchanges and cooperation and enriching the ideological connotation of contemporary Marxism

Productive Labour and Effective Demand Sydney H. Coontz, 2013-11-05 The connection between productive labour and effective demand has often been ignored and disputed in political economy even by giants like Ricardo and Marx This book traces the historical development of theories concentrating in particular on those of Malthus Marx and Keynes Particular attention is also paid to the Great Depression in the UK and USA The Pre Classical Approach The Classical Economists Socialists and Dissidents Anti Classical Theories in the Twentieth Century

The Dissolution of the Financial State Simon Mouatt, 2015-08-06 This book argues that post Keynesian theories of endogenous money can be combined with Marxian analysis in order to give insight into the changing power relations between the state finance sector and real economy since WW2 A key theme is that financial power derived from the control of money issue and its purchasing power is determined by the state and market in varying proportions depending on context but that state sovereignty has been lost in recent decades In addition the growth of financial markets in recent decades so called financialization has led many to assume that private finance is an important proximate driver of economic

affairs in general In contrast the book argues that this provides insufficient explanation of events To discuss financial factors as causes of financial crisis risks describing the phenomena without illustrating the root causes Instead the book argues that systemic drivers of capitalism rooted in production probably best understood by Marx actually do provide a more plausible explanation of the causes of the financialization and erosion of state sovereignty In addition the Post Keynesian descriptions of monetary processes are considered to best reflect the actual reality of the monetary system This represents an interesting synthesis of the classical Marx with modern money theory The interpretation of Marx used to explain this financial transformation has been named the Temporal Single System Interpretation which illustrates Marx's value theory across periods and identifies a tendency towards falling profit rates It is claimed that falling profits in turn are an underlying driver of the systemic propensity towards financialisation crisis and stagnation The empirical findings presented taken from case studies of the UK and Germany appear to support this view The central argument is that the response of agents including the state to the profit tendency has been a significant driver of the observed financial transformation The book then concludes that this synthesis provides a more appropriate explanation of the historical transformation of the financial system since the Great Depression than much of the financialization literature and illustrates the source and operation of financial power in the modern capitalist state and market

Capital (Complete Edition in Four Volumes) Karl Marx, 2022-03-08 This edition includes the complete four volumes of Capital by Karl Marx Volume I The Process of Production of Capital Volume II The Process of Circulation of Capital Volume III The Process of Capitalist Production as a Whole Volume IV Theories of Surplus Value Das Kapital also known as Capital A Critique of Political Economy or sometimes simply Capital German Das Kapital Kritik der politischen ökonomie 1867 1883 is a foundational theoretical text in materialist philosophy critique of political economy and politics by Karl Marx Marx aimed to reveal the economic patterns underpinning the capitalist mode of production in contrast to classical political economists such as Adam Smith Jean Baptiste Say David Ricardo and John Stuart Mill While Marx did not live to publish the planned second and third parts they were both completed from his notes and published after his death by his colleague Friedrich Engels Das Kapital is the most cited book published before 1950 in the social sciences
