Saunders, 2011-01-01 Defying predictions that the Internet would eventually create a world where nations disappeared in favor of a unified global village the new millennium has instead seen a proliferation of nationalism on the Web Cyberspace a vast digital terrain built upon interwoven congeries of data and sustained through countless public private communication networks has even begun to alter the very fabric of national identity. This is particularly true among stateless nations diasporic groups and national minorities which have fashioned the Internet into a shield again the assimilating efforts of their countries of residence As a deterritorialized medium that allows both selective consumption and inexpensive production of news and information the Internet has endowed a new generation of technology savvy elites with a level of influence that would have been impossible to obtain a decade ago Challenged nations from Assyrians to Zapotecs have used the Web to rewrite history engage in political activism and reinvigorate moribund languages This book explores the role of the Internet in shaping ethnopolitics and sustaining national identity among four different national groups

Albanians outside of Albania Russians in the near abroad Roma Gypsies and European Muslims Accompanying these case studies are briefer discussions of dozens of other online national movements as well as the ramifications of Internet nationalism for offline domestic and global politics. The author discusses how the Internet provides new tools for maintaining national identity and improves older techniques of nationalist resistance for minorities Bringing together research and methodologies from a range of fields Saunders fills a gap in the social science literature on the Internet's central role in influencing nationalism in the twenty first century By creating new spaces for political discourse alternative avenues for cultural production and novel means of social organization the Web is remaking what it means to be part of nation This insightful study provides a glimpse of this exciting and sometimes disturbing new landscape Shangri-La Michael Buckley, 2008-11-25 Appealing to the adventure traveler or armchair reader who simply wishes to browse and dream this guide promises to lead them into the glorious reality and breathtaking landscapes of the Himalayas Handbook Jason Whittaker, 2004 A comprehensive guide to all aspects of new media information technologies and the Fundamentals of Arts Management Pam Korza, Maren Brown, 2007 Anchoring the book are eleven tried and true chapters providing principles and best practices for managing and governing community arts organizations raising funds and presenting promoting and evaluating arts programs Four new chapters cover fundamentals of personnel management writing successful funding proposals advocating effectively for the arts and maximizing the arts role in the economic development of communities Nationally recognized leaders and authors in the community arts field offer historical and contemporary context regarding the role of the arts in community as well as insights about arts education and cultural access two important dimensions of local arts agencies work Also new are Online Companions to several chapters Easily accessed Online Companions offer expanded exploration of subject matter worksheets and other practical tools that can be downloaded and used or adapted and valuable resource listings that point to organizations publications and websites From publisher description **Professionalization in the Creative Sector** Margaret J.
