The Relevance of Bernard Lonergan's Notion of Self-appropriation to a Mystical-political Theology Ian B. Bell, 2008 In *The Relevance of Bernard Lonergan's Notion of Self Appropriation to a Mystical Political Theology* Ian Bell takes on the issue of the separation of the interior and exterior lives that has come to dominate mystical theology over the years The mystical life he claims is necessarily involved in the establishment of social structures and institutions that govern human living and the work of Bernard Lonergan on the human subject provides a means by which the connection between the interior and exterior lives may be established Because human persons operate in a consistent pattern regardless of a given moment's particularities mystical experience is no longer relegated to so called spiritual matters and the insights of mystics may be applied to the Christian call to live as agents of love With this connection in place mystical theology and political theology come together in a theology that is both mystical and political

world **Marx, Critical Theory, and Religion** ,2006-08-01 The Sociology of Religion has had several frameworks guiding its analysis including functionalism interpretive sociology phenomenology symbolic interactionism and now rational choice theory Marxism has tended to ignore religion assuming it is something that would eventually disappear even though it retained theological elements This collection of essays brings together a group of scholars who use frameworks provided by Marx and Critical Theory in analyzing religion It s goal is to establish a critical theory of religion within the sociology of religion as an alternative to rational choice In doing so it engages in a critique of the positivism uncritical praise of the market neoconservatism and one dimensional conception of rationality of the rational choice theory of religion The Promise of Critical Theology Marc P. Lalonde,2006-01-01 Written in tribute to one of the foremost Catholic theologians in the English speaking world the essays in The Promise of Critical Theology address the question Can critical theology secure its critical operation without undermining its foundation in religious tradition and experience Is critical theology simply an oxymoron when viewed from both sides of the equation From Marc Lalonde s introductory essay which delimits Davis fundamental position that the primary task of critical theology is the critique of religious orthodoxy the essays examine Davis distinction between faith and belief and build upon the promise of critical theology as inextricably bound to the promise of faith They ask What is its promise What particular religious ideas themes stories are appropriate for its concrete expression How can the community of faith receive its transformative message What might be the contribution of other religious traditions and philosophies Essays by Paul Lakeland Dennis McCann Kenneth Melchin Michael Oppenheim and Marsha Hewitt respond to these and other questions and critically relate Davis work to ongoing developments in modern theology critical theory philosophy and the social sciences Their diversity attests to the comprehensive scope of Davis thought and exemplifies the progressive character of contemporary religious discourse They honour Davis and illuminate the promise of critical religious thinking in itself Religion as a Human Capacity Ernest Thomas Lawson,Timothy Light,Brian Courtney Wilson,2004 Prepared in honor of E Thomas Lawson the essays in Religion as a Human Capacity offer a broad range of cognitivist theoretical explorations of religion as well as cutting edge applications of cognitive and other contemporary theories to religious data *Habermas, Modernity, and Public Theology* Don S. Browning,Francis Schüssler Fiorenza,1992 Jurgen Habermas is by far the most preeminent and influential philosopher in Germany today The scope of his writings is remarkable Their influence extends over a wide range of disciplines that include philosophy social theory hermeneutics anthropology linguistics ethics educational theory and public policy The impact of Habermas s writings on theology alone reaches from fundamental to political theology from moral to practical theology The significance of Habermas Modernity and Public Theology is twofold First it represents a genuine dialogue an actual conversation between Habermas and theologians While theologians have appealed to Habermas s work in innumerable articles and monographs he himself until now has remained silent This book then is unique insofar as it offers the true give and take of dialogue Second this book focuses on

Habermas's most recent work especially his interpretation of modernity his theory of communicative action and his development of a discourse ethics. In so doing it corrects some of the prevalent misreadings of Habermas within the theological literature devoted to him. In examining the relation between critical theory and a public and practical theology the contributors note both the promise and limitations of Habermas's basic arguments and insights. They challenge Habermas as much as they learn from him. Sharing the conviction that religious traditions contain sources for interpreting human nature and society they argue that if Habermas would attend more to the role of religion within life and society he would more fully realize his project for a communicative rationality under the conditions of modernity and would offer a more comprehensive understanding of rationality society and modernity. Taking his own turn at the end of the book Habermas responds to each of the contributors' comments on the broader theological reception of his work and offers his own fascinating views on the function and development of religion in modernity and on the status and claim to truth of theological discourse. The work concludes with an extremely useful annotated bibliography covering Habermas's own writings general introductions to Habermas and to critical theory and works devoted to specific aspects of Habermas's thought.

Catholic Social Thought Jonathan Boswell, Francis P. McHugh, Johan Verstraeten, 2000. These essays are an attempt to recover something of the form style and force of Catholic non official social thinking in the face of contemporary social thought and contemporary injustice in advanced societies. After an opening essay by the doyen of Catholic writers in this field Jean Yves Calvez SJ the book is divided into three sections. The first and largest group of essays discuss patterns and predicaments of Catholic social thought in general terms and from different points of view. The context here is partly the debate on modernity high modernity and post modernity partly the issue of how far and in what ways Catholic Social Thought can claim to be distinctive relative to contemporary secular thought. The second section of the book focusses on relationships between Catholic social thought and its restatement and a number of contemporary debates on public issues. Particular attention is given in successive essays to issues of anti poverty human rights economic theory and international finance. A third and shorter section describes a number of institutional projects which attempt to carry Catholic social values forward into concrete action focussing on work in health and welfare grass roots economic co operation anti poverty and international peace and justice. Final contributions by the reputed international scholar in this field John Coleman SJ and the book editors respectively evaluate the collection as a whole and discuss further steps.

Jürgen Habermas Detlef Horster, 2016-12-16. Ist das Habermas'sche Werk eine Ethik der Moderne. Mit seiner Darstellung der Habermas'schen Philosophie will Detlef Horster diese Frage beantworten. Die Analyse reicht von der ersten Auseinandersetzung mit Heidegger über Moralbewusstsein und kommunikatives Handeln bis zu der nationalen Einheit. 1990. Traditional Religion and Culture in a New Era Reimon Bachika, 2017-12-04. Where will postmodern culture lead us in the twenty first century. Will it destroy traditional cultures together with the old established religions that were its foundation.

These questions and the new concerns they evoke are explored in this important collection of original essays Contributors challenge entrenched assumptions about what many social scientists consider irreversible cultural trends These include cultural differentiation emphasis on individual identity movement toward religion as a private act rather than a community commitment and above all emphasis on the relativity of all knowledge and values The volume asserts three lines of argument in opposition to these trends The first is the teleological significance of traditional religions and archaic knowledge History can be said to have no goal but the same must not follow for human culture One can conceive individually of a hundred goals to live for However the quality of life cannot be that diverse Taken to the extreme cultural particularity and philosophical nihilism are insults to the life that emerged on our planet eons ago Second this volume emphasizes moral concern and the importance of universal values Ideas of human well being have been formulated from ancient times Religious beliefs invariably contain statements of value in the form of commandments and exhortations that express fundamental goals for a quality of life Third the nature of religion and spirituality is discussed Religion today has become controversial socially and marginal sociologically The role of religion in society is sometimes problematic or abused but it is also underestimated and misunderstood The authors suggest that contemporary religion might best be viewed as non ideological spiritual culture This in turn looks to a future in which religion and culture coalesce This volume includes an international cast of scholars from Japan the United States Canada the United Kingdom Germany Greece Italy New Zealand and Belgium All have engaged in research outside their own countries Taken as a whole this volume addresses issues of interest to those in the fields of futures studies religion and philosophy and in particular those concerned with human agency personal responsibility and public choice

Ideals and Illusions Thomas McCarthy, 1993 These lucid and closely reasoned studies of the thought of Jacques Derrida Michel Foucault Jürgen Habermas and Richard Rorty provide a coherent analysis of major pathways in recent critical theory They defend a position analogous to Kant's that ideas of reason are both unavoidable presuppositions of thought that have to be carefully reconstructed and persistent sources of illusions that have to be repeatedly deconstructed McCarthy examines the critique of impure reason from the complementary viewpoints of the attackers and defenders of Enlightenment rationality He first analyzes the work of Rorty Foucault and Derrida to determine what these radical critics have contributed to our understanding of reason and where they have gone wrong He explores Habermas's theory of communicative rationality focusing on the attempt to go beyond hermeneutics the incorporation of systems theory the implications of discourse ethics for our understanding of political debate and collective decision making and the relation of political theology to critical social theory Thomas McCarthy is Professor of Philosophy at Northwestern University and the editor of The MIT Press series Studies in Contemporary German Social Thought The analysis and assessment of Habermas's recent work in *Ideals and Illusions* serves as a sequel to his earlier study *The Critical Theory of Jürgen Habermas* **Books in Print**, 1977
