**Diffusion Processes and Fertility Transition** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, 2001-12-15 This volume is part of an effort to review what is known about the determinants of fertility transition in developing countries and to identify lessons that might lead to policies aimed at lowering fertility It addresses the roles of diffusion processes ideational change social networks and mass communications in changing behavior and values especially as related to childbearing A new body of empirical research is currently emerging from studies of social networks in Asia Thailand Taiwan Korea Latin America Costa Rica and Sub Saharan Africa Kenya Malawi Ghana Given the potential significance of social interactions to the design of effective family planning programs in high fertility settings efforts to synthesize this emerging body of literature are clearly important

**Consumer Demographics and Behaviour** Jo M. Martins, Farhat Yusuf, David A. Swanson, 2011-11-01 This is the book that market

strategists have been waiting for to position themselves in global markets and take advantage of the opportunities that demographic bonuses and deficits offer to them and their products It is also a book for teachers and students of consumer behaviour to grasp the importance of the life cycle as a framework that shapes the demand for goods and services determined by changes in social economic and physical functioning It gives insights into gendered consumer behaviour and cohort effects It presents a range of views on consumer behaviour and how demographic perspectives enhance these perspectives The book offers conceptual and analytical tools that can be used in the assessment of population characteristics as determinants of market size composition and potential for a variety of products It offers organising frameworks as well as empirical evidence of consumer behaviour in clusters of markets with different rates of population growth and age distribution that affect consumers priorities and demand for basic and progressive commodities The book shows commonalities as well as differences in consumer behaviour arising from different cultures and social customs It uses analytical tools that are explained and accessible to readers with a range of competences It is a book that can give a better understanding of consumer behaviour and market opportunities to the practitioner It can also be used for the instruction of students in demography consumer behaviour and marketing

#### **Fertility Transition in the Developing World**

John Bongaarts, Dennis Hodgson, 2022-09-01 This open access book provides an overview and analysis of the causes and consequences of the massive and highly consequential transition in reproductive behaviour that occurred in Asia Latin America and Africa since the mid 20th century In the 1950s contraceptive use was rare and women typically spend most of their reproductive years bearing and rearing children By 2020 fertility and contraceptive use in Asia and Latin America reached levels commonly observed in the developed world Africa's fertility is still high but transitions have started in all countries This monograph is the first to provide a comprehensive analysis of these trends and their determinants covering changes in reproductive behaviour e.g. use of contraception and abortion preferences e.g. desire to limit and space births and the role of socioeconomic development e.g. education The role of government policies and in particular family planning programs is discussed in depth Particular attention is given to provide a balanced assessment of several political and scientific controversies that have beset the field As such this book provides an interesting read for a wide audience of undergraduate and graduate students researchers and public health policy makers

#### **Techniques of Event History**

**Modeling** Hans-Peter Blossfeld, Gtz Rohwer, 2001-09-01 Including new developments and publications which have appeared since the publication of the first edition in 1995 this second edition gives a comprehensive introductory account of event history modeling techniques and their use in applied research in economics and the social sciences demonstrates that event history modeling is a major step forward in causal analysis To do so the authors show that event history models employ the time path of changes in states and relate changes in causal variables in the past to changes in discrete outcomes in the future and introduces the reader to the computer program Transition Data Analysis TDA This software estimates the sort of models

most frequently used with longitudinal data in particular discrete time and continuous time event history data Techniques of Event History Modeling can serve as a student textbook in the fields of statistics economics the social sciences psychology and the political sciences It can also be used as a reference for scientists in all fields of research **The Impact of**

Glover, 2012-11-29 Given the context and prevalence of HIV AIDS worldwide this volume presents information policy case studies and empirical research for use by educators policymakers and organizations about the relationship between HIV AIDS and education including how HIV AIDS has impacted education systems and the potential impact education has on HIV AIDS Prudence and Pressure Noriko O.

Tsuya, Feng Wang, George Alter, James Z. Lee, 2010-02-12 A study of human reproduction and social organization in preindustrial communities that reveals important similarities between Europe and Asia This pioneering study reconceptualizes the impact of social organizations economic conditions and human agency on human reproduction in preindustrial communities in Europe and Asia Unlike previous studies in which Asia is measured by European standards Prudence and Pressure develops a Eurasian perspective Drawing on rich new data and the tools of event history analysis the authors challenge the accepted Eurocentric Malthusian view that attributes prudence smaller families due to late marriage to the preindustrial West and pressure high mortality due to overpopulation to the East showing instead important similarities between Europe and Asia in human motivation and population behavior The authors analyze age gender family and household kinship social class and power religion culture and economic resources in order to compare reproductive strategies and outcomes They reveal underlying similarities between East and West in two major components of the reproductive regime marriage and childbearing and offer evidence showing that preindustrial reproduction was motivated and governed by human agency at least as much as by human biology Prudence and Pressure is part of a large scale interdisciplinary effort to use new data and methods to re examine the Malthusian paradigm of population growth It represents a significant advance in the fields of historical demography history and sociology **Event History Analysis**

Bollyky, 2019-10-01 Why the news about the global decline of infectious diseases is not all good Plagues and parasites have played a central role in world affairs shaping the evolution of the modern state the growth of cities and the disparate fortunes of national economies This book tells that story but it is not about the resurgence of pestilence It is the story of its decline For the first time in recorded history virus bacteria and other infectious diseases are not the leading cause of death or disability in any region of the world People are living longer and fewer mothers are giving birth to many children in the hopes that some might survive And yet the news is not all good Recent reductions in infectious disease have not been accompanied by the same improvements in income job opportunities and governance that occurred with these changes in wealthier countries decades ago There have also been unintended consequences In this book Thomas Bollyky explores the paradox in our fight against infectious disease the world is getting healthier in ways that should make us worry Bollyky interweaves a grand historical narrative about the rise and fall of plagues in human societies with contemporary case studies of the consequences Bollyky visits Dhaka one of the most densely populated places on the planet to show how low cost health tools helped enable the phenomenon of poor world megacities He visits China and Kenya to illustrate how dramatic declines in plagues have affected national economies Bollyky traces the role of infectious disease in the migrations from Ireland before the potato famine and to Europe from Africa and elsewhere today Historic health achievements are remaking a world that is both worrisome and full of opportunities Whether

the peril or promise of that progress prevails Bollyky explains depends on what we do next A Council on Foreign Relations Book     **Advanced Introduction to Demography** Lutz, Wolfgang,2021-09-10 Highlighting the power of multi dimensional demography this Advanced Introduction addresses the most consequential changes in our societies and economies using quantitative approaches It defines three demographic theories with predictive power demographic metabolism transition and dividend and repositions the discipline at the heart of social science     **India's Demographic Challenges** Bali Ram,Shefali S.
