American-Ukrainian nuclear relations Roman Popadiuk, 1996 On June 1 1996 the last strategic missiles were shipped from Ukraine to Russia bringing to an end a contentious issue that had marred the early stages of U S Ukraine relations In welcoming this development President Clinton stated I applaud the Ukrainian government for its historic contribution in reducing the nuclear We remain committed to supporting Ukraine through its ambitious and far sighted reforms and to working with Ukraine and our European partners to promote Ukraine's integration into the European community Elimination of Ukraine's strategic warheads was a goal that had spanned two U S administrations and that had been at the center of Western concerns There were many obstacles that had to be overcome on all sides Through a combination of diplomacy and cajoling Ukraine had undertaken a final ratification of the START Treaty in February 1994 and acceded to the Nuclear Non Proliferation Treaty in November 1994 And in January 1994 in the Trilateral agreement the United States Ukraine and Russia laid the foundation for the elimination of the warheads that was completed

in 1996 and that led to President Clinton's positive assessment. This study examines the early history of U.S.-Ukraine relations over the nuclear weapons issue. It presents both the history of a 2-year period (1992-1994) and posits a number of explanations as to why things developed the way they did. The goal is to establish a framework of this important period from which scholars can further proceed.

**Managing crises in defense industry** Steven R. Linke, 1996. National planning for the expeditious recovery and expansion of essential industrial production facilities is often geared only to large-scale declared emergencies. Under the worst scenario of a global war, all necessary authorities and funding are assumed to be available. But more often, lesser emergencies require responses without the broad powers and commitment associated with a declared national emergency. A real emergency can provide insight into the appropriateness of planned management approaches and the adequacy of available authorities. This account of two actual emergencies provides lessons on how statutory procedures could be improved, regulations clarified, the government data base expanded, and steps taken to speed up the process to be followed in the event of other crises. In May 1988, the United States lost half of its capacity to produce ammonium perchlorate when explosions and fire destroyed one of the two producing plants. Ammonium perchlorate is the oxidizer essential to solid fuel rocket motors. Here, without question, was an excellent test case. Existing ammonium perchlorate had to be carefully allocated, and additional production capacity was needed. Numerous ongoing production programs for both strategic and conventional systems needed the product, and some would be curtailed if sufficient ammonium perchlorate was not available. This paper documents the government's actions and decision-making process in dealing with various legal and administrative hurdles in both restoring the capacity and allocating available ammonium perchlorate.

Understanding Land Warfare Christopher Tuck, 2022-06-22. This textbook provides a thorough grounding in the vocabulary, concepts, issues, and debates associated with modern land warfare. The second edition has been updated and revised and includes new chapters on non-western perspectives and hybrid warfare. Drawing on a range of case studies spanning the First World War through to contemporary conflicts in Syria, Ukraine, and Nagorno Karabakh, the book explores what is unique about the land domain and how this has shaped the theory and practice of military operations conducted upon it. It also looks at land warfare across the spectrum of its conduct, including conventional campaigning, counterinsurgency, and peace support and stabilisation operations. Key themes and debates identified and analysed include the tensions between change and continuity, the role of technology in land warfare, the relevance of culture and context, the difficulties in translating theory into effective military practice, in-depth discussions on issues of immediate contemporary significance, including hybrid warfare, emerging military technologies, and the military reform processes of the US, Russian, and Chinese land forces. This book will be essential reading for military practitioners and for students of land warfare, military history, war studies, and strategic studies.
