

Figure 2: Overview of our proposed MaPLe (Multi-modal Prompt Learning) framework for prompt learning in V-L models. MaPLe tunes both **vision** and **language** branches where only the **context prompts** are learned, while the rest of the model is frozen. MaPLe conditions the vision prompts on language prompts via a V-L coupling function \mathcal{F} to induce mutual synergy between the two modalities. Our framework uses **deep contextual prompting** where separate context prompts are learned across multiple transformer blocks.
