From Dissertation to Book William Germano, 2022-12-22 How to transform a thesis into a publishable work that can engage audiences beyond the academic committee When a dissertation crosses my desk I usually want to grab it by its metaphorical lapels and give it a good shake You know something I would say if it could hear me Now tell it to us in language we can understand Since its publication in 2005 *From Dissertation to Book* has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers Now revised and updated to reflect the evolution of scholarly publishing this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees At the heart of *From Dissertation to Book* is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience a committee or advisors to those of a broader scholarly audience that wants writing to be both informative and engaging William Germano offers clear guidance on how to do this with advice on such topics as rethinking the table of contents taming runaway footnotes shaping chapter length and confronting the limitations of jargon alongside helpful timetables for light or heavy revision Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy whether reading on a page or a screen He also acknowledges that not all dissertations can or even should become books and explores other often overlooked options such as turning them into journal articles or chapters in an edited work With clear directions engaging examples and an eye for the idiosyncrasies of academic writing he reveals to recent PhDs the secrets of careful and thoughtful revision a skill that will be truly

invaluable as they add author to their curriculum vitae **From Dissertation to Book** William Germano, 2005-04-08 All new PhDs hope that their dissertations can become books But a dissertation is written for a committee and a book for the larger world William Germano's *From Dissertation to Book* is the essential guide for academic writers who want to revise a doctoral thesis for publication The author of *Getting It Published* Germano draws upon his extensive experience in academic publishing to provide writers with a state of the art view of how to turn a dissertation into a manuscript that publishers will notice Acknowledging first that not all theses can become books Germano shows how some dissertations might have a better life as one or more journal articles or as chapters in a newly conceived book But even dissertations strong enough to be published as books first need to become book manuscripts and at the heart of *From Dissertation to Book* is the idea that revising the dissertation is a fundamental process of adapting from one genre of writing to another Germano offers clear guidance on how to do just this Writers will find advice on such topics as rethinking the table of contents taming runaway footnotes shaping chapter length and confronting the limitations of jargon alongside helpful timetables for light or heavy revision With crisp directives engaging examples and a sympathetic eye for the foibles of academic writing *From Dissertation*

Shaping the Digital Dissertation Virginia Kuhn, Anke Finger, 2021-05-04 This volume is a timely intervention that not only helps demystify the idea of a digital dissertation for students and their advisors but will be broadly applicable to the work of librarians administrators and anyone else concerned with the future of graduate study in the humanities and digital scholarly publishing Roxanne Shirazi The City University of New York Digital dissertations have been a part of academic research for years now yet there are still many questions surrounding their processes Are interactive dissertations significantly different from their paper based counterparts What are the effects of digital projects on doctoral education How does one choose and defend a digital dissertation This book explores the wider implications of digital scholarship across institutional geographic and disciplinary divides The volume is arranged in two sections the first written by senior scholars addresses conceptual concerns regarding the direction and assessment of digital dissertations in the broader context of doctoral education The second section consists of case studies by PhD students whose research resulted in a natively digital dissertation that they have successfully defended These early career researchers have been selected to represent a range of disciplines and institutions Despite the profound effect of incorporated digital tools on dissertations the literature concerning them is limited This volume aims to provide a fresh up to date view on the digital dissertation considering the newest technological advances It is especially relevant in the European context where digital dissertations mostly in arts based research are more popular Shaping the Digital Dissertation aims to provide insights precedents and best practices to graduate students doctoral advisors institutional agents and dissertation committees As digital dissertations have a potential impact on the state of research as a whole this edited collection will be a useful resource for the wider academic community and anyone interested in the future of doctoral studies

Media Authorship Cynthia Chris, David A. Gerstner, 2013-02-15 Contemporary media authorship is frequently collaborative participatory non site specific or quite simply goes unrecognized In this volume media and film scholars explore the theoretical debates around authorship intention and identity within the rapidly transforming and

globalized culture industry of new media Defining media broadly across a range of creative artifacts and production cultures from visual arts to videogames from textiles to television contributors consider authoring practices of artists designers do it yourselves media professionals scholars and others Specifically they ask What constitutes media and authorship in a technologically converged globally conglomerated multiplatform environment for the production and distribution of content What can we learn from cinematic and literary models of authorship and critiques of those models with regard to authorship not only in television and recorded music but also interactive media such as videogames and the Internet How do we conceive of authorship through practices in which users generate content collaboratively or via appropriation What institutional prerogatives and legal debates around intellectual property rights fair use and copyright bear on concepts of authorship in new media By addressing these issues Media Authorship demonstrates that the concept of authorship as formulated in literary and film studies is reinvigorated contested remade even reauthored by new practices in the digital media environment

Brause, 2012-10-02 Increasing numbers of adults are enrolling in doctoral programmes but their earlier college lives often do not prepare them for the rules of the academic game Many have no idea what a dissertation looks like how it gets that way or what options are available to

them This book is a practical guide for students who need help in progressing from the decision to write a dissertation to the planning writing and defending of it It includes samples of proposals and dissertations that have been accepted and data drawn from a number of sources including focus groups with doctoral students and graduates and responses to an open ended questionnaire from doctoral students across the United States The Demise of the Library School Richard J. Cox,2010 In *The Demise of the Library School* Richard J Cox places the present and future of professional education for librarianship in the debate on the modern corporate university The book is a series of meditations on critical themes relating to the education of librarians archivists and other information professionals playing off of other commentators analyzing the nature of higher education and its problems and promises **A Guide to Surviving a Career in Academia** Emily Lenning,Sara Brightman,Susan Caringella,2010-09-13 Navigating an academic career is a complex process to be successful requires mastering several rites of passage This comprehensive guide takes academics at all stages of their career through a journey beginning at graduate school and ending with retirement A Guide to Surviving a Career in Academia is written from a feminist perspective and draws on the information offered in workshops conducted at national meetings like the American Society of Criminology and the Society for the Study of Social Problems Through the course of the book an expert team of authors guide you through the obstacle course of finding effective mentors during graduate school finding a job negotiating a salary teaching collaborating with practitioners successfully publishing earning tenure and redressing denial and finally retirement This collection is a must read for all academics but especially women just beginning their careers who face unique challenges when navigating through these age old rites of passage *From Dissertation to Christian Book* Ian Darke,2025-04-15 Ian Darke has produced a kind of shepherd s manual intended to lead a dispersed doctoral flock across the plains and through the valleys that lie between the graduated doctor and the publishing of his doctoral labours as a fresh accessible and well tuned gift to the reading public *The Problem with Science* R. Barker Bausell,2021 Recent events have vividly underscored the societal importance of science yet the majority of the public are unaware that a large proportion of published scientific results are simply wrong The Problem with Science explains in nontechnical language how such fallacy occurs how it gets published in respected scientific journals and how it can largely be avoided Completing a Professional Practice Dissertation Jerry W. Willis,Ron Valenti,Deborah Inman,2010-06-01 A growing number of both established and newly developed doctoral programs are focusing on the preparation of practitioners rather than career researchers Professional doctorates such as the Doctor of Nursing Practice DNP Doctor of Education EdD Doctor of Pharmacy PharmD Doctor of Professional Studies DProf or DPS and the Doctor of Psychology PsyD are in fact just a few of the professional doctorates being offered today Professional doctorates are the fastest growing segment of doctoral education The nature of the dissertation and the process of completing a dissertation can be quite different in a professional practice doctoral program but there are few resources for both students and faculty involved in completing and mentoring such dissertations This book

was written specifically for students and faculty involved in professional practice dissertation work. It addresses both the tasks and procedures that professional practice dissertations have in common with dissertations in research doctoral programs as well as the tasks and issues that are more common in professional practice doctoral programs. For example, negotiating entry into applied settings and securing the cooperation of practicing professionals is covered, as are alternative models for the dissertation, e.g., the three article dissertation or TAD. The book also covers tasks such as getting IRB approval for applied dissertation research conducted in the field and how to propose and carry out studies based on applied and professional models of research. This book, written by three experienced mentors of professional practice dissertation students, is the comprehensive guide for both students and faculty.

Compendium for Early Career Researchers in Mathematics Education Gabriele Kaiser, Norma Presmeg, 2019-04-26. The purpose of this Open Access compendium, written by experienced researchers in mathematics education, is to serve as a resource for early career researchers in furthering their knowledge of the state of the field and disseminating their research through publishing. To accomplish this, the book is split into four sections: Empirical Methods, Important Mathematics Education Themes, Academic Writing, and Academic Publishing, and a section Looking Ahead. The chapters are based on workshops that were presented in the Early Career Researcher Day at the 13th International Congress on Mathematical Education (ICME 13). The combination of presentations on methodological approaches and theoretical perspectives shaping the field in mathematics education research, as well as the strong emphasis on academic writing and publishing, offered strong insight into the theoretical and empirical bases of research in mathematics education for early career researchers in this field. Based on these presentations, the book provides a state-of-the-art overview of important theories from mathematics education and the broad variety of empirical approaches currently widely used in mathematics education research. This compendium supports early career researchers in selecting adequate theoretical approaches and adopting the most appropriate methodological approaches for their own research. Furthermore, it helps early career researchers in mathematics education to avoid common pitfalls and problems while writing up their research and provides them with an overview of the most important journals for research in mathematics education, helping them to select the right venue for publishing and disseminating their work.
