Coasean Economics Law and Economics and the New Institutional Economics Steven G. Medema, 2012-12-06 Upon hearing that Ronald Coase had been awarded the Nobel Prize a fellow economist's first response was to ask with whom Coase had shared the Prize Whether this response was idiosyncratic or not I do not know I expect not Part of this type of reaction can no doubt be explained by the fact that Coase has often been characterized as an economist who wrote only two significant or influential papers *The Nature of the Firm* 1937 and *The Problem of Social Cost* 1960 And by typical professional standards of significant and influential i.e. widely read and cited this perception embodies a great deal of truth even subsequent to Coase's receipt of the Prize This is not to say that there have not been other important works *The Marginal Cost Controversy* 1946 and *The Lighthouse* in

Economics 1974 come immediately to mind here only that in a random sample of say one hundred economists one would likely find few who could list a Coase bibliography beyond the two classic pieces noted above in spite of Coase's significant publication record. The purpose of this collection is to assess the development of tensions within and prospects for Coasean Economics those aspects of economic analysis that have evolved out of Coase's path breaking work. Two major strands of research can be identified here law and economics and the New Institutional Economics.

Market Socialism Or the Restoration of Capitalism? Anders Aslund, 1992 When East European communism collapsed in the revolutions of 1989 the newly liberated countries discarded socialism altogether. For the first time most of Eastern Europe experienced free elections and a multitude of parties mostly with liberal conservative or nationalist connotations made their entry into political life. A bewildered world is now trying to imagine the future course of events. Has capitalism won or is something different emerging? Has market socialism vanished for good? How can the transitionary period be managed and what effect will it have on the standard of living in Eastern Europe? In this book ten distinguished experts explore this transition to a market economy in Eastern Europe. In part I the authors consider what remains of market socialism. Włodzimierz Brus discusses the future roles of both planning and the market. Mario Nuti argues that market socialism never existed whilst Gerhard Fink outlines how a normal market economy can be established.

The Fall Steven Saxonberg, 2017-07-05 With a foreword by Seymour Lipset Hoover Institution and George Mason University USA. The Fall examines one of the twentieth century's great historical puzzles: why did the communist led regimes in Eastern Europe collapse so quickly and why was the process of collapse so different from country to country? This major study explains why the impetus for change in Poland and Hungary came from the regimes themselves while in Czechoslovakia and East Germany it was mass movements which led to the downfall of the regimes.
