Economic Commentaries:

The Relationship of Prices to Economic Stability and Growth, Commentaries United States. Congress. Economic Joint Committee,1958 *Economic Commentaries* Sir Dennis Holme Robertson,1956 [Economic Commentaries](#) Dennis H. Robertson,1981-05-01 **Economics** David A. Dieterle,2017-03-27 A comprehensive four volume resource that explains more than 800 topics within the foundations of economics macroeconomics microeconomics and global economics all presented in an easy to read format As the global economy becomes increasingly complex interconnected and therefore relevant to each individual in every country it becomes more important to be economically literate to gain an understanding of how things work beyond the microcosm of the economic needs of a single individual or family unit This expansive reference set serves to establish basic economic literacy of students and researchers providing more than 800 objective and factually driven entries on all the major themes and topics in economics Written by leading scholars and practitioners the set provides readers with a framework for understanding economics as mentioned and debated in the public forum and media Each of the volumes includes coverage of important events throughout economic history biographies of the major economists who have shaped the world of economics and highlights of the legislative acts that have shaped the U S economy throughout history The extensive explanations of major economic concepts combined with selected key historical primary source documents and a glossary will endow readers with a fuller comprehension of our economic world **OECD Economic Surveys: Sweden 2017** OECD,2017-02-08 This 2017 OECD Economic Survey of Sweden examines recent economic developments policies and prospects The special chapters cover income inequality and gender inequality **Economic Commentaries** Dennis H. Robertson,1956 [New Challenges in Economic Policy, Business, and Management](#) Anna Ujwary-Gil,Marta Gancarczyk,2020-01-01 The first part of this volume broadens the understanding of contemporary industrial policy in local regional national and international contexts The chapter by Wojnicka Sycz 2020 undertakes one of the most important challenges in RIS3 i e the evaluation of the impact of regional SS industries on the development of Polish regions Based on the spatial panel models for 2012 2017 she reveals the positive impact of SS industries employment dynamics on regional GDP per capita The chapter responds to the research gap in a direct measurement of how SS areas affect regional development The results provide the rationale for policy makers to pursue these strategies further The chapter contributes to regional New Industrial Policy by proving the efficiency of SS in strengthening regional performance Factors and barriers to the development of smart mobility in mediumsized Polish cities are the focus of the chapter by Kachniewska 2020 The author applies a comprehensive set of methods to tackle this issue and identifies the conditions for smart mobility drawing primarily on expert opinions The results enable a natural generalization of the identified determinants to the similar context of Polish towns the more important that the research on medium cities is much rarer than studies on metropolises This contribution belongs to the research streams of city governance and databased services which

are closely connected to and dependent on industrial digital transformation Moreover smart mobility addresses the objective of environmental protection one of the crucial targets of NIP Godlewska Dziobo 2020 performs international comparisons between Central and Eastern European Countries in 2020 2018 Particularly she focuses on the sectoral transformation of the employment structure in these countries Besides the important observations of spatial dynamics in sectoral structures the chapter points to the increased importance of services relative to manufacturing in contemporary structural transformations Thus it justifies the expanded scope of New Industrial Policy that encompasses not only industry recently refreshed with 4 0 Revolution but also services particularly the digital ones The chapter by Czech 2020 identifies the impact of global debt on the national amounts outstanding of credit default swap contracts CDS in nonfinancial institutions She finds the dynamics of the CDS notional amounts outstanding in response to global household indebtedness and total non financial sector indebtedness in domestic banks This contribution brings valuable practical insights about the core and dynamics of CDS and their usefulness in alleviating risks in international exchange We find this input particularly relevant for industries and enterprises operating in global value chains Widera 2020 performs a spatial analysis of the induced population potential of the communes in the Opolska region in 2000 and 2018 The econometric analysis revealed both the own potential of the communes and the interactions with neighboring communes to develop this potential These findings are important to theorize about the bottom level sources of territorial units potential both internal and those stemming from spatial interactions We find these conclusions relevant to understand local level origins of regional transformations as well as interdependencies among local territorial units The next two parts of this volume present micro level and bottomup contexts for industrial policy Particularly these are the insights from management and business research and from the research on governing various stakeholder interests and networks In the second part based on management and business theory and empirical evidence the authors discuss human resource and technological challenges faced by the contemporary industry Potoczek 2020 performs a bibliometric research to recognize the advancement of the process approach in organizations She finds the research on process improvement as emerging The major research community in that area belongs to the IT field while management researchers are still a minor group The author recommends the increased interest from the management field as conducive to the 4 0 transformation of organizational processes These results provide policy relevant input to the understanding of how academic research tackles digital transformation in organizational processes The chapter by Igielski 2020 uses a survey among a sample of large enterprise senior managers headquartered in Poland to check whether and how they develop employee skills for the challenges of Industry 4 0 The results are pessimistic since they reveal the lack of adaptive and developmental actions in this regard Nevertheless there is also a positive sign namely the awareness of the challenges posed by the 4 0 revolution Thus the chapter is valuable for the recommendations as to competence development in industrial transition to the digital economy Flak 2020 presents an interesting test for the system of organizational terms as

to its usefulness in the practice of motivating people and in a dedicated software Based on a research experiment in real life business settings the author proves the applicability of theory driven organizational terms in software applications supporting managers in their motivating functions The chapter contributes important observations as to the interrelations among managerial and technological resources in motivating employees Sztorc 2020 investigates lean management tools at hotels in Poland based on a large sample of hotel representatives The results are helpful in understanding the types of lean management tools as well as their major targets in the researched organizations The input of the study rests in filling the research gap as to the particular tools of lean management applied in the hotel industry to improve services and processes The focus of this chapter on a particular industry provides a relevant basis for further application and upgrading of this service sector The chapter by Mazurkiewicz 2020 offers an assessment of the impact of national culture on career orientation and career values among Polish and Chinese students of economics Surprisingly the value system does not differ much between the two national samples despite the distinct characteristics of the two national cultures according to Hofstede's method Consequently the author assumes national culture as moderator of career values rather than their determinant These results provide a contribution to the understanding of job motivations among future corporate employees a critical determinant of all industrial transitions Kowalik 2020 investigates the economic benefits perceived by student participants of scientific projects Based on the survey the author reveals students' recognition of scientific projects as bringing economic effects The study offers practical implications for young people engaging in research activities as well as for research policy that might acknowledge additional important outcomes besides purely scientific objectives The third part discusses how governing networks and interests can ensure sustainable and socially responsible industries and enterprises Sectoral and industrial collaborations are supposed to enhance industrial convergence EOCIC 2019 In this vein Lis 2020 focuses on collaborative attitudes in clusters and technological parks Cluster organizations are established to rip the localization and agglomeration economies as well as synergies from cooperative links Despite some history of operations the surveyed Polish cluster initiatives and technology parks still reveal low development of enterprise cooperation The author suggests self-evaluation of management and participants of the researched organizations to understand the accomplished level of collaboration and derive practical implications This contribution is important to understand the performance of some organizational measures of industrial policy and their real input to industrial transformation The chapter by Kowalczyk 2020 investigates sociocultural conditions of CSR practices in the construction industry of selected European countries Based on a survey with a large convenience sample the author confirms the strength of stakeholder pressure on CSR practice as well as the mediating role of company culture in this relationship At the same time country differences were indicated as significant for CSR practice and worth further explanation of its variance This study is valuable for the explanation of interests and stakeholder pressure affecting a particular industry thus determining the development conditions of that industry Another

industry specific study has been proposed by Kurzak Mabrouk 2020 who focuses on food businesses This chapter addresses the critical strategic direction of NIP that refers to sustainable and responsible growth with regard to environmental protection The author performed the interviews with top and middle managers of a large representative sample of Polish food companies The findings are optimistic since the majority of companies undertake the efforts towards comprehensive sustainable development strategies voluntarily and not only due to legal enforcement Still the researched enterprises do not fully apply these strategies as yet Resonating with the study by Lis 2020 Flieger 2020 identifies network types according to the collaboration maturity level in a local government unit The research on collaborative networks in public organizations still remains unique Therefore this study fills the research gap The author uses a casebased approach to identify the network features that change according to the maturity level of relationships The findings are useful for the practice of developing collaboration in local governments and contribute to our understanding of the context for industrial development

Managing the International Economy in the Age of Globalisation Peter Sutherland, 1998 Text of the 1998 Per Jacobsson lecture held in Washington D C on 4 October 1998 *Principles of Ethical Economy* P. Koslowski, 2012-12-06 John Maynard Keynes wrote to his grandchildren more than fifty years ago about their economic possibilities and thus about our own I see us free there fore to return to some of the most sure and certain principles of religion and traditional virtue that avarice is a vice that the exaction of usury is a misde meanour We shall once more value ends above means and prefer the good to the useful Economic Possibilities for Our Grandchildren pp 371 72 In the year 1930 Keynes regarded these prospects as realizable only after a time span of one hundred years of which we have now achieved more than half The present book does not share Keynes's view that the possibility of an integration of ethics and economics is dependent exclusively on the state of economic development though this integration is certainly made easier by an advantageous total economic situation The conditions of an economy that is becoming post of ethics cultural industrial and post modern are favorable for the unification theory and economics Economic development makes a new establishment of economic ethics and a theory of ethical economy necessary Herdecke and Hanover October 1987 P K TABLE OF CONTENTS Foreword v Introduction 0 1 Ethical Economy and Political Economy 0 1 1 Ethical Economy as Theory of the Ethical Presuppositions of the Economy and Economic Ethics 3 0 1 2

The Management of the British Economy, 1945-2001 Nicholas Woodward, 2004 Since 1945 British governments have played an active role in managing the economy in the interests of securing high employment economic growth and low inflation with their approach evolving in response to changing economic circumstances intellectual shifts and past policy failures This book provides an overview of economic management particularly financial management and addresses how it has changed and why it has not always been successful It examines the actual policies that were introduced the problems that various governments faced in implementing them and how the approach to policymaking changed It also examines the main phases of economic policymaking and the conduct of policymaking as there is a widespread consensus that until recently short run economic management could have been more successful than it was
