*Modelling the Costs of Environmental Policy* Rob B.

Dellink,2005-01-01 Extending economic models to include environmental emissions and environmental policy is now commonplace Yet the linking is often ad hoc and based on peculiar assumptions In this book Rob Dellink shows how emissions and emission reduction policies for five different environmental issues can be included in a forward looking computable general equilibrium model building emissions into production and consumption functions At the technical level the book is superb and stands out for its exact specification of how this is done Richard S J Tol Hamburg University Germany Free University Amsterdam The Netherlands and Carnegie Mellon University US This important new book enhances our understanding of the dynamic interactions between economic activity economic growth pollution abatement and environmental policy It addresses one main policy problem how can the direct and indirect costs of environmental policy for multiple pollutants be properly assessed in an applied model      **Selected Water Resources Abstracts** ,1979      Mining Environmental Handbook: Effects Of Mining On The Environment And American Environmental Controls On Mining Jerrold J Marcus,1997-05-03 Negative environmental events make the headlines Mining industry examples are the recent incidents at Summitville Colorado US and the cyanide leak at Cambria Resource s Omai Operation in Guyana In this volatile atmosphere the publication of the Mining Environmental Handbook comes at an opportune time It presents an objective comprehensive and integrated examination of the effects of mining on the environment and the environmental laws that deal with mining Though stressing activities in the United States of America it covers all of North America North American environmental standards are currently being exported around the world Consequently this handbook will be of prime interest in countries that are now coming to terms with mining environmentalism It should benefit working engineers and environmentalists manufacturers legislators regulators financiers and journalists It has been selected as a university textbook Finally it will be an indispensable reference during serious discussions about mining environmentalism      *Proceedings of the First US/USSR Environmental Economics Symposium* ,1979      **The Economics Of Environmental And Natural Resources Policy** J. **Environmental Regulation** J. Hemmelskamp,K. Rennings,F. Leone,2013-11-27 Innovation oriented environmental regulation is extremely attractive for policy planners and decision makers since it is expected that innovations can cut costs of environmental measures and overcome existing trade offs between economic and ecological goals The central question is however how such a regulatory regime of environmental policy approaches should look like This book provides an excellent overview of the state of research by presenting and discussing theoretical approaches towards a framework of environmental regulation and innovation international case studies as well as econometric and modelling studies from Europe and the USA

**Environmental Justice Context, Challenges and National Approaches** OECD,2024-05-28 There is mounting evidence that depending on social and economic circumstances some communities and groups may face disproportionate exposure to environmental hazards bear an inequitable share of the costs associated with environmental policies or face more barriers to participating in environmental decision making As countries increase their efforts to tackle environmental degradation pollution and climate change the concept of environmental justice can shed light on how to ensure fairness in the processes and outcomes of environmental policymaking This report examines the plurality of the concept of environmental justice its underlying conceptual pillars and how it has emerged in different contexts around the world The report also provides the first policy stocktake of how governments across the OECD and beyond are seeking to redress environmental justice concerns building upon insights from 26 responses to the OECD Environmental Justice Survey as well as complementary desk analysis across a broader set of countries *Energy Abstracts for Policy Analysis* ,1987
