**For Another Europe** Guglielmo Carchedi, 2001 In this innovative work Guglielmo Carchedi argues that only an analysis centered on class as the basic unit of social life with production and distribution of value understood as the bedrock of the economy can throw light on the internal contradictions of European economic integration Two specific themes emerge from this radical approach First familiar topics such as competition and social policy economic and monetary union the Common Agricultural Policy and immigration are treated in an original manner Second subjects usually ignored in the standard textbooks for instance the role of interest groups in the Union s decision making process are shown to be of crucial importance in understanding the economics of the European Union This work therefore provides both an introduction to and a critique of the European project The book s central message however is that another sort of Europe is possible one based on the erosion of economic polarization on the abolition of Europe s imperialist relations with the Third World and on the creation of truly democratic institutions of self determination

*The New Industrial Policy of the European Union* Adam A. Ambroziak, 2016-10-08. The main objective of this book has been to carry out research into the definition of industrial policy and its goals, to evaluate previously introduced policies and instruments and to identify the future challenges for and features of a modern EU industrial policy. A modern industrial policy is seen as a non-traditional policy towards the industrial sector based not necessarily on only the elimination of market failures within the sectoral and/or horizontal approaches but rather on the expanding the scope of industrial economic activities within the framework of both the pre and post fabrication stages. The book targets three market segments: academics, policy and decision makers at the EU, national and regional level as well as business practitioners. It includes a wide-ranging analysis of different spheres of industrial policies conducted within the European Union, making it of interest to an international audience. Each chapter also offers detailed and valuable comments as well as conclusions that can be generally applied, ensuring the book's universality. The book presents the results of a research project conducted in the Collegium of World Economy at the Warsaw School of Economics.

*Central and Eastern European Agriculture in an Expanding European Union* Stefan Tangermann, M. Banse, 2000-01-01. The problems caused by the proposed enlargement of the EU to include the associated Central and Eastern European countries (CEEC) are discussed in this book. The two main agricultural issues raised by this are the relative competitiveness of CEEC agricultural policies.

**European Political Economy** Leila Simona Talani, 2020-09-10. As with the previous version (Ashgate 2004), this second edition is divided for didactic purposes into two parts. The first part provides an overview of political science approaches to European political economy, both mainstream and critical ones. As such, it contributes directly to the current debate among scholars of political science and international political economy concerning the nature of the process of European integration. The second part provides alternative explanations of some European economic policy events: the ECB banking regulation, fiscal coordination, the crisis of the euro zone, social policy and unemployment, allowing the reader to assess the explanatory value of competing approaches.

**EU Bioeconomy Economics and Policies: Volume I** Liesbeth Dries, Wim Heijman, Roel Jongeneel, Kai Purnhagen, Justus Wesseler, 2019-11-27. This two-volume book provides an important overview to EU economic and policy issues related to the development of the bioeconomy. What have been the recent trends and what are the implications for future economic development and policy making? Volume I explores the economic theory of bioeconomy policy as well as European integration, European agriculture, EU budget and future developments in EU agriculture policies.
