Martell, 2013-04-23 This book introduces green ideas to students of the social sciences showing how society affects and is affected by nature and assessing the future of the green movement **Regulatory Transformations** Bettina Lange, Fiona

Haines, Dania Thomas, 2015-09-10 The issue of whether transnational risk can be regulated through a social sphere goes to the heart of what John Ruggie has described as embedded liberalism how capitalist countries have reconciled markets with the social community that markets require to survive and thrive This collection located in the wider debates about global capitalism and its regulation tackles the challenge of finding a way forward for regulation It rejects the old divisions of state and market citizens and consumers social movements and transnational corporations as well as economic and social regulation Instead this rich multidisciplinary collection engages with a critical theme the idea of harnessing the regulatory capacity of a social sphere by recognising the embeddedness of economic transactions within a social and political landscape This collection therefore explores how social norms practices actors and institutions frame economic transactions and thereby regulate risks generated by and for business state and citizens A key strength of this book is its integration of three distinct areas of scholarship Karl Polanyi's economic sociology regulation studies and socio legal studies of transnational hazards The collection is distinct in that it links the study of specific transnational risk regulatory regimes back to a social theoretical discussion about economy society interactions informed by Polanyi's work Each of the chapters addresses the way in which economics as well as economic and social regulation can never be understood separately from the social particularly in the transnational context Endorsement This thought provoking collection asks the most critical question of our time how to civilise markets through social accountability and political action The climate and financial crises we face show how crucial this challenge is Lange Haines and Thomas have put together a series of fruitful case studies of the possibilities for embedding economic relationships in social relationships by a series of top class researchers within their own illuminating and sensitive framing of the issue Professor Christine Parker Professor of Regulatory Studies at Monash University The Cumulative Book Index , 1995 A world list of books in the English language **International Environmental Affairs** , 1995

Exit from Globalization Richard Westra, 2014-10-24 Exit from Globalization moves from theory to practice from questions of where incorrigible knowledge of substantive economic life derives and how that knowledge is put towards making a progressive redistributive eco sustainable future of human flourishing Westra discards at the outset views that the root of current economic ills is the old devil we know capitalism Rather he maintains the neoliberal decades spawned a Merchant of Venice economic excrescence bent upon expropriation and rent seeking which will scrape all the flesh from the bones of humanity if not stopped dead in its tracks En route to providing a viable design for the human future in line with

transformatory demands of socialists and Greens Westra exorcizes both Soviet demons and ghosts of neoliberal ideologues past which lent support to the position that there is no alternative to the market Exit from Globalization shows in a clear and compelling fashion that while debates over the possibility of another potentially socialist world swirl around this or that grand society wide scheme the fact is that creative future directed thinking has at its disposal several economic principles that transformatory actors may choose from and combine in various ways to remake human economic life The book concludes with an examination of the various social constituencies currently supporting radical change and explores the narrowing pathways to bring change about

Alternative Societies Luke Martell, 2023-02-24 Bringing together a wide range of approaches and new strands of economic and social thinking from across the US Asia Mexico Latin America Europe Middle East and Africa this book critically assesses the alternatives to capitalism Forschungsjournal Neue Soziale Bewegungen Ansgar Klein, Hans-Josef Legrand, Thomas Leif, 2013-03-09 *Environment and Social Theory* John Barry, 2007-01-24 This thematic rather than theorist centred approach is an essential guide to the way in which the environment and social theory relate to one another including examinations of the works of the key theorists including Marx Mill Habermas and Adorno *Politics and the Environment* James Connelly, Graham Smith, David Benson, Clare Saunders, 2003-09-02 Politics and the Environment has established itself as the most comprehensive textbook in this area This new edition has been completely revised and updated while retaining the features and theory to practice focus which made the first edition so successful The book is designed to

introduce students to the key concepts and issues vital to the understanding of environmental problems and their political solutions The authors investigate the people movements and organizations involved in the shaping of environmental policy and the barriers hindering the development and introduction of successful solutions to environmental problems This new edition has been expanded to include a reorganized structure divided into three thematic sections a wide range of case studies from around the world at the end of each chapter more boxed examples and concepts further detail on ecological modernization an extended further reading list including useful websites **Choice** ,1995 Environment and Society Erika Cudworth,2005-08-04 At the start of the twenty first century it can be argued that human societies have a greater impact on the environment than ever before We have always been dependent upon and interacted with the natural environment However the dramatic social changes of the past three centuries have altered the form of our relationship with non human nature to the extent that some would see people planet relations as in a situation of crisis Environment and Society provides a comprehensive and critical account of the ways in which we can think about the relationship between human societies and the environments with which they interact It argues that human societies are ecologically embedded and that environments are often socially embedded and constituted It makes the different theoretical positions and empirical studies accessible to students and includes chapter outlines and summaries annotated further reading boxed case studies and discussion points The British National Bibliography Arthur James Wells,1995
