Health Technology Assessment and Health Policy Today: A Multifaceted View of their Unstable Crossroads Juan E. del Llano-Señarís, Carlos Campillo-Artero, 2015-01-08 This book disentangles the issues in connection with the advancement of Health Technology Assessment HTA and its interface with health policy It highlights the factors that should shape its progress in the near future Interdisciplinary and critical views from a number of professionals are put together in a prescient order to cast some light and make recommendations as to the next steps HTA should take to be fit for purpose A wealth of documents dealing with HTA have been published over the last three decades HTA allegedly is one of the bedrocks of regulation and medical decision

making However counter vailing visions contend that geographical variations in the role that HTA is actually playing within countries pinpoints specific room for improvement Given our social preferences cherry picking HTA s features and successes over the last decades moves it away from its possibility frontier Some of the most noteworthy hindrances that HTA faces in several countries to making headway towards its consolidation as an efficient tool for regulation and decision making are as follows insufficient resources delays in assessment inadequate priority setting regulatory capture public distrust actual influence on regulatory decisions the need for strengthening international cooperation and harmony the lack of sound and consistent assessments of diagnostic tests medical devices and surgical innovations and limited dissemination Time has come for HTA to take a renewed stand There is a pressing need to submit HTA to in depth critical scrutiny
