Health Insurance Is A Family Matter:

Health Insurance is a Family Matter Institute of Medicine, Board on Health Care Services, Committee on the Consequences of Uninsurance, 2002-09-18 Health Insurance is a Family Matter is the third of a series of six reports on the problems of uninsurance in the United States and addresses the impact on the family of not having health insurance The book demonstrates that having one or more uninsured members in a family can have adverse consequences for everyone in the household and that the financial physical and emotional well being of all members of a family may be adversely affected if any family member lacks coverage It concludes with the finding that uninsured children have worse access to and use fewer health care services than children with insurance including important preventive services that can have beneficial long term effects

Angel, Laura Lein, Jane Henrici, 2006-05-29 Poor Families in America's Health Care Crisis examines the implications of the fragmented and two tiered health insurance system in the United States for the health care access of low income families For a large fraction of Americans their jobs do not provide health insurance or other benefits and although government programs are available for children adults without private health care coverage have few options Detailed ethnographic and survey data from selected low income neighborhoods in Boston Chicago and San Antonio document the lapses in medical coverage that poor families experience and reveal the extent of untreated medical conditions delayed treatment medical indebtedness and irregular health care that women and children suffer as a result Extensive poverty the increasing proportion of minority households and the growing dependence on insecure service sector work all influence access to health care for families at the economic margin

A Shared Destiny Institute of Medicine, Board on Health Care Services, Committee on the Consequences of Uninsurance, 2003-03-05 A Shared Destiny is the fourth in a series of six reports on the problems of uninsurance in the United States This report examines how the quality quantity and scope of community health services can be adversely affected by having a large or growing uninsured population It explores the overlapping financial and organizational basis of health services delivery to uninsured and insured populations the effects of community uninsurance on access to health care locally and the potential spillover effects on a community s economy and the health of its citizens The committee believes it is both mistaken and dangerous to assume that the persistence of a sizable uninsured population in the United States harms only those who are uninsured

America's Uninsured Crisis Institute of Medicine, Board on Health Care Services, Committee on Health Insurance Status and Its Consequences, 2009-08-01 When policy makers and researchers consider potential solutions to the crisis of uninsurance in the United States the question of whether health insurance matters to health is often an issue This question is far more than an academic concern It is crucial that U S health care policy be informed with current and valid evidence on the consequences of uninsurance for health care and health outcomes especially for the 45.7 million individuals without health insurance From 2001 to 2004 the Institute of Medicine IOM issued six reports which concluded that being uninsured was hazardous to people s health and recommended that the nation move quickly to implement a strategy to achieve health insurance coverage for all The goal of this book is to inform the health reform policy debate in 2009 with an up to date assessment of the research evidence This report addresses three key questions What are the dynamics driving downward trends in health insurance coverage Is being uninsured

harmful to the health of children and adults Are insured people affected by high rates of uninsurance in their communities

Insuring America's Health Institute of Medicine,Board on Health Care Services,Committee on the Consequences of Uninsurance,2004-02-14 According to the Census Bureau in 2003 more than 43 million Americans lacked health insurance Being uninsured is associated with a range of adverse health social and economic consequences for individuals and their families for the health care systems in their communities and for the nation as a whole This report is the sixth and final report in a series by the Committee on the Consequences of Uninsurance intended to synthesize what is known about these consequences and communicate the extent and urgency of the issue to the public Insuring America's Health recommends principles related to universality continuity of coverage affordability to individuals and society and quality of care to guide health insurance reform These principles are based on the evidence reviewed in the committee's previous five reports and on new analyses of past and present federal state and local efforts to reduce uninsurance The report also demonstrates how those principles can be used to assess policy options The committee does not recommend a specific coverage strategy Rather it shows how various approaches could extend coverage and achieve certain of the committee's principles *Hidden Costs, Value Lost* Institute of Medicine,Board on Health Care Services,Committee on the Consequences of Uninsurance,2003-06-19 Hidden Cost Value Lost the fifth of a series of six books on the consequences of uninsurance in the United States illustrates some of the economic and social losses to the country of maintaining so many people without health insurance The book explores the potential economic and societal benefits that could be realized if everyone had health insurance on a continuous basis as people over age 65 currently do with Medicare Hidden Costs Value Lost concludes that the estimated benefits across society in health years of life gained by providing the uninsured with the kind and amount of health services that the insured use are likely greater than the additional social costs of doing so The potential economic value to be gained in better health outcomes from uninterrupted coverage for all Americans is estimated to be between 65 and 130 billion each year

Covering the Uninsured Through the Eyes of a Child United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Health,2007 *Covering the uninsured through the eyes of a child : hearings* , **Public Health Reports** ,2002 Prevention Practice in Primary Care Sherri Sheinfeld Gorin,2014 Prevention Practice in Primary Care systematically explores state of the art practical approaches to effective prevention in primary care Guided by theory and evidence the book reviews approaches to risk factor identification and modification for the major causes of mortality in adulthood including cancer stroke and cardiovascular disease *Women's Health Research* Institute of Medicine,Board on Population Health and Public Health Practice,Committee on Women's Health Research,2010-11-27 Even though slightly over half of the U S population is female medical research historically has neglected the health needs of women However over the past two decades there have been major changes in government support of women's health research in policies regulations and the organization of research efforts To assess the impact of these changes Congress directed the Department of Health

and Human Services HHS to ask the IOM to examine what has been learned from that research and how well it has been put into practice as well as communicated to both providers and women Women s Health Research finds that women s health research has contributed to significant progress over the past 20 years in lessening the burden of disease and reducing deaths from some conditions while other conditions have seen only moderate change or even little or no change Gaps remain both in research areas and in the application of results to benefit women in general and across multiple population groups Given the many and significant roles women play in our society maintaining support for women s health research and enhancing its impact are not only in the interest of women they are in the interest of us all **Hispanic Families at Risk**

Ronald J. Angel, Jacqueline L. Angel, 2009-07-25 In the United States work is the key to economic success as well as the major source of health care coverage and retirement security While Europeans look to the State for these benefits Americans for the most part do not This system of employment based benefits means that those disadvantaged in the labor market are also disadvantaged in terms of health care coverage and retirement security The authors of this work examine the overrepresentation of Mexican Americans in low wage or service sector jobs which rarely come with health insurance or retirement coverage At all ages Mexican Americans have lower rates of health insurance and retirement coverage than do other minority groups such as African Americans or other Hispanic groups Although employment in jobs that do not provide benefits is one major source of this disparity other factors including immigration history citizenship status and language proficiency further block opportunities for upward mobility within the Mexican American population In their analysis the authors work to deemphasize the popular cultural explanation for the economic disparities and focus on more practical policy based solutions In each chapter the authors identify and critique the factors that affect the economic security and health care access of individuals throughout the life course suggesting policies for reform This work will be of interest to anyone working in the fields of cultural studies public health and the sociology of work With the focus on real world causes for the problems as well as potential solutions policy makers will also find this informative book an essential resource **McKenzie's An**
