Health Planning and Regulation Drew Altman, Richard Greene, Harvey M. Sapolsky, 1981 Risk assessment and risk management in regulatory decision-making United States. Presidential/Congressional Commission on Risk Assessment and Risk Management, 1997 *Real-world data and real-world evidence in regulatory decision making* Council for International Organizations of Medical Sciences, 2024-05-29 In recent years many medicines regulatory agencies have expressed increased willingness to consider real world evidence RWE that derives from the review and or analysis of real world data RWD to support claims of efficacy or effectiveness as well as of safety This increased willingness is changing the regulatory environment in which RWE is generated and used This consensus report aims to describe the potential use of RWE for decision making RWD and data sources key scientific considerations in the generation of RWE and ethical and governance issues in using RWD The intended audience for this report includes medicinal product regulators healthcare payers health care and medicinal products industries researchers bioethicists patients and health care professionals This report was developed to inform discussions about the use of RWD and RWE for regulatory and health care decision making including decisions to make a product available for use authorisation to cover the costs of its use reimbursement and to use a product for a particular patient clinical use This report reflects the opinions of the Council for International Organizations of Medical Sciences CIOMS Working Group XIII on Real world data and real world evidence in regulatory decision making and it was finalised after considering comments received during a public consultation <https://doi.org/10.56759/kfxh6213> Advance Directives: Rethinking Regulation, Autonomy & Healthcare Decision-Making Hui Yun Chan, 2018-10-03 This book offers a new perspective on advance directives through a combined legal ethical and philosophical inquiry In addition to making a significant and novel theoretical contribution to the field the book has an interdisciplinary and international appeal The book will help academics healthcare professionals legal practitioners and the educated reader to understand the challenges of creating and implementing advance directives anticipate clinical realities and preparing advance directives that reflect a higher degree of assurance in terms of implementation **Encyclopedia of Medical Decision Making** Michael W. Kattan, 2009-08-15 Decision making is a critical element in the field of medicine that can lead to life or death outcomes yet it is an element fraught with complex and conflicting variables diagnostic and therapeutic uncertainties patient preferences and values and costs Together decisions made by physicians patients insurers and policymakers determine the quality of health care quality that depends inherently on counterbalancing risks and benefits and competing objectives such as maximizing life expectancy versus optimizing quality of life or quality of care versus economic realities Broadly speaking concepts in medical decision making MDM may be divided into two major categories prescriptive and descriptive Work in the area of prescriptive MDM investigates how medical decisions should be done using complicated analyses and algorithms to determine cost effectiveness measures prediction methods and so on In contrast descriptive MDM studies how decisions

actually are made involving human judgment biases social influences patient factors and so on The Encyclopedia of Medical Decision Making gives a gentle introduction to both categories revealing how medical and healthcare decisions are actually made and constrained and how physician healthcare management and patient decision making can be improved to optimize health outcomes Key Features Discusses very general issues that span many aspects of MDM including bioethics health policy and economics disaster simulation modeling medical informatics the psychology of decision making shared and team medical decision making social moral and religious factors end of life decision making assessing patient preference and patient adherence and more Incorporates both quantity and quality of life in optimizing a medical decision Considers characteristics of the decisionmaker and how those characteristics influence their decisions Presents outcome measures to judge the quality or impact of a medical decision Examines some of the more commonly encountered biostatistical methods used in prescriptive decision making Provides utility assessment techniques that facilitate quantitative medical decision making Addresses the many different assumption perspectives the decision maker might choose from when trying to optimize a decision Offers mechanisms for defining MDM algorithms With comprehensive and authoritative coverage by experts in the fields of medicine decision science and cognitive psychology and healthcare management this two volume Encyclopedia is a must have resource for any academic library

Data-Driven Decision Making in Fragile Contexts Alexander Hamilton,Craig Hammer,2017-06-16 The need for evidence based decision making at all levels of government is perhaps greatest in fragile settings Data deficiencies contribute to state fragility and exacerbate constraints on the capacity to provide basic services public security and the rule of law The lack of robust good quality data can also have a disabling effect on government efforts to manage political conflict Indeed the lack of data can worsen conflict since violent settings pose substantial challenges to knowledge generation capture and application The development of sustainable and professional data literate stakeholders who are able to produce and increase the quality and accessibility of official statistics can help to improve development outcomes Good quality and reliable statistics are required to track the progress of development policies through the monitoring of performance indicators and targets and to ensure that public resources are achieving results Although reliable data alone cannot have a transformative effect without the right contextual incentives they constitute an essential prerequisite for greater accountability and more efficient decision making Data Driven Decision Making in Fragile Contexts Evidence from Sudan explores methods and insights for data collection and use in fragile contexts with a focus on findings from Sudan It

begins by posing several questions on the political economy of data and then sets out a framework for assessing the validity, reliability and potential impact of data on decision making in fragile settings. It then provides insights regarding the challenges associated with data driven decision making in Sudan derived from the 2014 15 United Kingdom's Department for International Development Sudanese household survey. Featured are data driven analyses of diverse topics from public service delivery to the interplay of governance, trust and state legitimacy. As the data revolution and the advent of the Sustainable Development Goals herald an increasing need to solicit the perceptions and experiences of program beneficiaries, the impetus to develop and deploy good quality survey instruments will increase. This volume provides an important proof of concept that this type of endeavor is both feasible and useful in fragile contexts and in combination with other important data collection tools can be effectively utilized to enrich the evidence base of decision making in these settings.

Overcoming Cognitive Biases in Strategic Management and Decision Making Siniksaran, Enis, 2024-02-12. The persistent presence of cognitive biases has influenced rational decisions and strategic management since the 1970s. These prejudiced errors in judgment often systematic and predictable breach the foundational assumptions of economic theory leading to dire consequences such as social inequality, financial collapse and governmental inefficiency. Even the brightest minds are not immune making it crucial to address these biases head on. *Overcoming Cognitive Biases in Strategic Management and Decision Making* unravels the complex tapestry of biases that infiltrate decision making processes at all levels. From social injustice, biases and reasoning errors to action inaction and social biases, the book confronts the myriad of ways that biases manifest in critical moments. These pose a significant threat to sound decision making in various fields impacting professionals ranging from judges and doctors to public officials. The repercussions of unchecked biases are far reaching leading to flawed outcomes that echo through society. The urgent need for a strategic response to mitigate these biases and enhance decision making processes forms the crux of the problem this book seeks to address.
