Barrett,2016-05-23 The notion of the individual creator a product in part of the Western romantic ideal is now troubled by accounts and explanations of creativity as a social construct While in collectivist cultures the assimilation but not the denial of individual authorship into the complexities of group production and benefit has been a feature the notion of the lone individual creator has been persistent Systems theories acknowledge the role of others yet at heart these are still individual views of creativity focusing on the creative individual drawing upon the work of others rather than recognizing the mutually constitutive elements of social interactions across time and space Focusing on the domain of music the approach taken in this book falls into three sections investigations of the people processes products and places of collaborative creativity in compositional thought and practice explorations of the ways in which creative collaboration provides a means of crossing boundaries between disciplines such as music performance and musicology and studies of the emergence of creative thought and practice in educational contexts including that of the composer and the classroom The volume concludes with an extended chapter that reflects on the ways in which the studies reported advance understandings of creative thought and practice The book provides new perspectives to our understandings of the role of collaborative thought and processes in creative work across the domain of music including composition musicology performance music education and music
