Heat Shock Proteins and Cytoprotection Alexander E. Kabakov, Vladimir L. Gabai, 2012-12-06 *Purine and Pyrimidine Metabolism in Man IX* Andrea Griesmacher, Peter Chiba, Mathias M. Müller, 2012-12-06 This volume comprises articles presented at the joint IX International and 6 European Symposium on Purine and Pyrimidine Metabolism in Man held in Gmunden Austria June 1 through 7 1997 Since the first of this series of meetings was held in Israel in 1973 conventions were organized every three years in different parts of the world including the USA Japan and Europe The different aspects of purine and pyrimidine metabolism bring together researchers working in molecular genetics biochemical pharmacology biochemistry developmental biology immunology epidemiology and the clinics Oriented research in the field has been seminal for the development of potent anticancer and antiviral drugs As the number of genes which are cloned grows the understanding of metabolism is increasingly enlarged and might provide leads to further improve therapeutic concepts and to better understand mechanisms responsible for the development of resistance against these drugs In certain diseases purine and pyrimidine analogs represent not only the drugs of choice but in fact are the sole therapeutic alternative at present The field has also taken an early lead in attempting to correct inborn errors of purine and pyrimidine metabolism by gene therapy The organization of this meeting involved a large number of people who dedicated their time in an effort to make this symposium a success We thank the Abstract Review Committee the International Advisory Board and in particular the Symposium Secretariat for doing a wonderful job Progress in Botanical Research Ioannes Tsekos, Michael Moustakas, 2012-12-06 This volume is the final document of the 1st Balkan Botanical Congress and comprises after reviewing the full texts of the Congress Lectures submitted by their authors The articles refer to all branches of plant sciences in the field of pure and applied research The subjects dealt with in the Congress and each representing a separate section in this book covered the following areas of interest I Taxonomy geobotany and evolution II Biochemistry metabolism and bioenergetics III Ecology and ecophysiology IV Structure and its dynamics V Genetics plant breeding and biotechnology VI Growth development and differentiation The Congress was organized by the Department of Botany Aristotle University of Thessaloniki and the Hellenic Botanical Society The city of Thessaloniki was chosen by the Organizers since it enjoyed the accolade of the cultural capital of Europe for the year 1997 The Thessaloniki Congress has taken on the character of an International Congress since 320 scientists mainly from the Balkan countries and the rest of Europe 26 countries in all took part in it The 11 invited speakers who shared their experience with us were well known specialists from all the European countries **Base Excision Repair of DNA Damage** Ian D. Corvin,2007 Apoptosis is the regulated form of cell death It is a complex process defined by a set of characteristic morphological and biochemical features that involves the active participation of affected cells in a self destruction cascade This programmed cell death plays a critical role in physiological functions such as cell deletion during embryonic development balancing cell number in continuously renewing tissues and immune system development Additionally a dysregulation of apoptosis is underlying in numerous pathological situations such as Parkinson Alzheimer s disease and cancer fruits and vegetables and certain beverages such as tea and wine which are rich in polyphenols with reduced risk of chronic diseases including cancer Apoptosis is also the regulatory mechanism involved in the removal of unnecessary cells during development and in tissue homeostasis in a wide range of organisms from insects to mammals The aim of this book is to provide new studies in the field of apoptosis research
