in this book it is understood as technologies that have arrived with the Information Revolution i.e. those associated with computers and Information Communication Technology. Examples of such technologies are electronics devices, computer video, collaborative writing tools, social networking, and the Internet. Innovative applications of technology in the classroom mean more than teaching basic computer skills and software programs in the class. It must happen across the disciplines and curriculum in ways that teaching and learning processes can be enhanced. It must also support active engagement, group participation, local and global collaboration, and interaction. This book presents innovative applications of educational technology tools in teaching and learning across various disciplines.
