

Hospital Readmissions Strategy: Optimization through Standardization

The hospital readmission review and performance practice varied across the organization and lacked real-time performance measures. The focus of the hospital readmission reduction program has been on creating a foundation to drive performance by decreasing variation, developing real-time reporting, and leveraging data insights to improve outcomes.

Decrease variances in the hospital readmission review process

Outcome: transitioned from 21-different hospital readmission review processes to one standard process

Increase the amount of actionable data captured for hospital readmissions review

Outcome: increased from 11 primary measured metrics for hospital readmissions to 30 with 41 secondary metrics

Establish an adherence model to eliminate process variations

Outcome: increased adherence from 40% at low performing locations to 98% across the enterprise

Create a new series of reports to better visualize hospital readmission data

Outcome: created three new real-time reports and updated one existing report in hospital readmissions reporting suite
